

Introduction to the Social Freelance Community SFC Cooperative

What is the Goal, the Vision, the Mission of the SFC COOP? The SFC CommUnity Network aims to create a space where all people can come together and strike a balance between individual life necessities and emerging social projects, each with their own unique focus and intention. SFC provides a new infrastructure system that promotes bottom-up democracy, economic growth, and education, while also providing support to individuals and organizations alike. SFC accomplishes its goals by promoting peace, unity, and progress through new and constructive means.

We don't pretend to have the right solutions to the problems of the 21st century. Instead we aim at supporting one another successfully by prioritizing ideas and deciding on which ones to take action first. Ultimately SFC improves the collective human being user experience on this planet by putting Consciousness back at the center where it belongs and focusing on one individual at a time.

Info Video: [Introduction to Unity Network](#)

To achieve our Vision, we are creating and building three primary infrastructure models:

1. **New Economic Infrastructures**
2. **New Decision Making Infrastructures**
3. **New Educational Infrastructures**

These infrastructures make us intrinsically unique, for anyone that crosses our path, right from the first communication that triggers clear interest in getting involved with us, immediately:

1. **Receive Value for any Time dedicated to SFC**
2. **Benefits Empowerment with Decision Making Rights**
3. **Adheres to the Total Transparency Policies for Public Accountability**

Here the link to more details about these rights that anyone gains when getting involved with us: [Member & New Potential Worker Rights & Policies Information DOC](#)

We **Create, Capture, Track, and Issue Value** in different types of social assets that can be easily transferred within transactions in the current financial environment. These economic systems are designed to facilitate the use of these assets and increase their value as we become more successful and functional.

At the heart of our network is the "LIFE Support Alliance", a social program which aims to assist individuals with their basic life necessities (LIFE Support Program). Once these needs are met, people often require support in other areas, such as launching a business, pursuing their dreams, or creating an organization. This is where our Organizational Support Program (or Legal Support Program) comes in, offering guidance and resources to help individuals or organizations achieve their goals.

Our network provides Unified Entrepreneurial Support Services and Cooperative Sponsorship to assist individuals, clients, and nonprofits in starting and developing their businesses, organizations, and projects.

→Visit <http://Sponsorship.wc.tc> for more information, or
→Visit <http://CauseCollective.org> and <http://WCTC.world> for Non-Profit 501c3 Cooperative Sponsorship opportunities.

We also focus on providing new socially responsible innovative business solutions that foster a shared economy benefiting everyone in many different ways.

All positions within the SFC CommUnity Network are held publicly accountable and operate under a transparent framework. While aliases are permitted, it's important to consider the legal and cultural implications of your specific location. You'll never be asked to do anything that makes you uncomfortable. The network is involved in large-scale movements. In some countries, political organizing can be punishable and illegal. While the network doesn't directly organize these types of protests, it may be indirectly involved and can be affiliated.
