

Dear \_\_\_\_\_:

I recently discovered this resource that I feel would be an incredible learning experience for my students.

GERMS. They lurk in every classroom. Each year, students miss an estimated 164 MILLION school days due to illness. In this project, students will fight back against these microscopic monsters with this public-service project designed to make your school—and the world—a safer and healthier place. They will collect germs from common surfaces such as desks, laptops, and more. Then they'll test the effectiveness of disinfectants in fighting germs. Finally, they'll create a public service announcement for their school!

Imagine if kids could keep themselves and their families healthier by developing smart habits to protect against germs. What a great way to build healthy routines to last a lifetime!

If you'd like more information, you can explore Blue Apple Projects at [www.blueappleteacher.org](http://www.blueappleteacher.org).

The project costs **\$60**, includes all project plans and supplies, and would allow me lifetime access to the online resources. It also includes modifications for online and hybrid learning environments. I feel like it would be great for my students. **Would you be able to help out?**

If you have any questions or would like to discuss further, please do not hesitate to ask.

Thank you so much for your support!

Sincerely,
