

International Banking Network 'Royal Banks'

The international banking network 'Royal Banks' was founded by a couple of bankers on e-sim for a more trustworthy banking system within the game e-sim. Because our combined network we can offer the highest quality service for all citizens of e-sim. Our advantage is that because of our large network we have more knowledge of banking and therefore will be better to serve your needs.

Why would you take a loan or save your savings at the IBN?

We guarantee an as high as possible percentage to get your money back. We can guarantee this because our extensive cooperation among each other will make sure we can help each other with short debts. This means that if one bank is still waiting for its incoming loans, other banks can help pay back the savings accounts for a reduced fee and therefore making your money stay safe.

Our latest project is a combined 'Credit Rating' account with other banks, so we can monitor lending and saving behaviour of citizens. The credit rating of a citizens is depending on a couple of factors and influences the interest rates we offer.

The credit rating project combined with a stricter form of giving out loans (<http://tinyurl.com/loanrequirements>) will decrease the percentage of loans not being paid back. And therefore ensuring your savings!

We are looking forward doing business with you, you can usually find one of us on IRC: #esim.bank

Otherwise you can always send us an PM

Yours Sincerely,

peter potatis
