

# Get Started with Prodigy - Students

---

## To join your teacher's class:

- Log in to [Classlink](#) on a computer or the Classlink app on your device with the student's Google account.
- Go to the Math folder and then Prodigy Math.
- Sign in with the student Google account. If prompted, type it in.

- 
- Next, you will be asked if you have an existing Prodigy account

The screenshot shows a web interface for Prodigy. At the top, it says "Step 1 of 2". Below that is the heading "Do you have a Prodigy account?". A paragraph of text explains that if the user hasn't signed in with this Google email before, they can either enable Google sign-in for an existing account or create a new one. There are two main options presented in rounded rectangular boxes. The first option, "I have a Prodigy account", includes an icon of a person and the text "Enable Google sign-in for an existing Prodigy account." The second option, "I want a new account", includes an icon of a person with a plus sign and the text "Create a brand new account using Google." At the bottom of the screen is a dark teal button labeled "Next".

- If you have an existing Prodigy account and you can remember the username and password, click "I have a Prodigy account" and then Next. The next screen will prompt you to login with your existing Prodigy account in order to link it to the school Google account.
- If you can't remember your existing Prodigy username and password OR if you don't have one, click on "I want a new account" and then Next. Select Student and Create Account.

- 
- Once you are logged in, you should be prompted to enter a class code. Your child's teacher should provide that. Enter the class code and click Next.
  - Start playing Prodigy!
