Coordination and remote sprinting

You can use Discord to communicate with other sprinters: **#sprint** channel under “OCA days” category. Remote participation is welcome of course.

Join [here](#).

Rules

1. Have fun!
2. Please take a few minutes to report your work in this document.
 - *For every topic, share your planning for others to join!*
 - *List your achievements to share with our community*
3. Everyone make at least one review among [one of these repositories](#) ;)

Planning

MONDAY 6TH NOVEMBER

- 10:00 - 10:15 - short start up speech, presentation of the rules and sprint tracks
- 10:15 - 13:00 - code sprint
- 13:00 - 14:20 - lunch break and photo
- 14:20 - 17:00 code sprint
- 17:00 - 18:00 - presentation of achievements by each sprint track

TUESDAY 7TH NOVEMBER

- 09:30 - 12:00 - code sprint
- 12:00 - 13:00 - lunch break and photo
- 13:00 - 15:00 - code sprint
- 15:00 - 16:00 - presentation of achievements by each sprint track
- 16:00 - 17:30 - please help pack up the rooms

Suggested topics

Thank you to our OCA Days 2023 Event Sponsors

Add your own topic below. Please, each table must fill here a “Heading 2” title to name its subject and provide:

- Link to the Github repository
- List of Participants
- Planning of the sprint (explain briefly what's your plan)
- Achievements

w

Example:

Topics 1

Repo(s)

<https://github.com/OCA/XY>

List of Participants

- Mr One
- Mrs Two

Goals

The goals is to ports all modules to version 11

Achievements

PR NN has been merged to support ...

1. New module landed for...

EDI Framework

Repo(s)

<https://github.com/OCA/edi>

<https://github.com/OCA/edi-framework>

List of Participants

- Mr Jaume Bernaus
- Mr Willig Benjamin
- Pierre Verkest
- Héctor Villarreal Ortega

Thank you to our OCA Days 2023 Event Sponsors

Goals

1. General improvements on EDI Framework
2. Option to relate a EDI Exchange Record with multiple odoo records
3. Discuss about cXML PunchOut ([OCA/edi pull 817](#))
4. Finalize plan discussed https://github.com/OCA/edi/pull/787#discussion_r1319477936 in order to save responses using edi_webserivce_oca module:
 - a. <https://github.com/OCA/web-api/pull/22>
 - b. <https://github.com/OCA/edi/pull/787>
5. Add traceback to exchange error field instead of error only
<https://github.com/OCA/edi/pull/852>

Achievements

-

OCA bot

Repo(s)

<https://github.com/OCA/oca-github-bot>

List of Participants

- [Simone Rubino](#)

Goals

Close <https://github.com/OCA/oca-github-bot/issues> (37 at the moment) and <https://github.com/OCA/oca-github-bot/pulls> (6 at the moment).

Achievements

- Created PR <https://github.com/OCA/oca-github-bot/pull/268> to fix <https://github.com/OCA/oca-github-bot/issues/193>
- Created PR <https://github.com/OCA/oca-github-bot/pull/267> superseding abandoned <https://github.com/OCA/oca-github-bot/pull/220>
- Reviewed already open PRs
 - <https://github.com/OCA/oca-github-bot/pull/258#pullrequestreview-1714658875>
 - [merged]
<https://github.com/OCA/oca-github-bot/pull/216#pullrequestreview-1714641105>

PyCharm - Odoo Autocompletion Support Plugin

Repo(s)

<https://github.com/wt-io-it/odoo-pycharm-plugin>

List of Participants

- Andreas Perhab

Goals

Write Integration Tests to reproduce the issues reported on github

Achievements

Improved Integration Tests to be able to open a fresh odoo / OCB / server-tools project

Odoo-module-migrator with openupgrade

Repo(s)

<https://github.com/OCA/odoo-module-migrator>

`pip3 install --upgrade git+https://github.com/OCA/odoo-module-migrator/@master`

List of Participants

- Juan José Scarafia
- Bruno Zanotti

Goals

The idea is to consume the openupgrade analysis and re-use it to ease modules migrations with odoo-module-migrator

Notes:

Links:

- <https://github.com/OCA/OpenUpgrade>
- <https://github.com/OCA/odoo-module-migrator/pull/83>
- https://github.com/OCA/OpenUpgrade/tree/16.0/openupgrade_scripts

Thank you to our OCA Days 2023 Event Sponsors

- Documentation for analysis <https://oca.github.io/OpenUpgrade/analysis.html>

Run de scripts

- Custom adhoc:
 - On ".env" comment server_wide_modules
 - Uncomment ignore src repositories
 - Instalar en ambas versiones "pip install mako odooirc"
 - Seguimos instrucciones de [acá](#)

Python

Achievements

1. Initialization of 17 <https://github.com/OCA/odoo-module-migrator/pull/80>
2. Add removed models: <https://github.com/OCA/odoo-module-migrator/pull/81>
3. Add read_group refactor script <https://github.com/OCA/odoo-module-migrator/pull/82>
4. Add open view form check: <https://github.com/OCA/odoo-module-migrator/pull/84>

Sign

Repo(s)

<https://github.com/OCA/sign>

List of Participants

- Enric Tobella

Goals

Migration of the module to 16.0

Achievements

5. Migration to 16.0: <https://github.com/OCA/sign/pull/11>

Thank you to our OCA Days 2023 Event Sponsors

Mig Connector & Queue job

Repo(s)

<https://github.com/OCA/connector>

<https://github.com/OCA/queue>

List of Participants

- Ruchir Shukla
- Krunal Dabhi
- Paul Cantinean
- Georg Notter

Goals

The goal is to migrate the modules for those Repo from v16 to v17

OpenUpgrade scripts

Repo(s)

<https://github.com/OCA/OpenUpgrade>

List of Participants

- Carmen Bianca Bakker (carmenbianca)
- Rémy Taymans (remytms)
- Pedro Baeza

Goals

Finish migration scripts for previous version and start other for 17.0.

- ☐ Generate module upgrade analysis for 17.0
- ☒ ~~Write wiki page for changes in 17.0:~~
<https://github.com/OCA/maintainer-tools/wiki/Migration-to-version-17.0>
- ☐ Write scripts for 16.0
- ☐ Write scripts for 17.0
- ☒ ~~Attempt to make sense of delivery migration~~
<https://github.com/OCA/OpenUpgrade/pull/4112>

Thank you to our OCA Days 2023 Event Sponsors

- ☒ Working and discussing about hr migration :-
<https://github.com/OCA/OpenUpgrade/pull/3911>

Achievements

Repo maintainer

Repo(s)

<https://github.com/OCA-devel/repo-maintainer>
<https://github.com/OCA-devel/repo-maintainer-conf>

List of Participants

- Simone Orsi
- Enric Tobella

Goals

Move to OCA org and manage a subset of repos for testing

Achievements

Repos have been creating, still missing a token in ordert to finish it.

Search_engine / connector_typesense

Repo(s)

<https://github.com/OCA/search-engine>

List of Participants

- MrTango - Maik Derstappen

Goals

The goals is to have another search engine backend with Typesense, which is similar to Argolia but open source and simpler to manage and use than Elastic Search
