

2016-09-13 Dataverse Community Call

Agenda

- Introduce Julian Gautier
- <https://waffle.io/IQSS/dataverse>
- Questions from the Community

Attendees

- Danny Brooke (IQSS)
- Gustavo Durand (IQSS)
- Julian Gautier (IQSS)
- Phil Durbin (IQSS)
- Amber Leahey (SP)
- Kaitlin Newson (SP)
- Kevin Worthington (SP)
- Sherry Lake (UVA/LibraData)
- Slava (DANS)

Notes

- Julian
 - <http://www.iq.harvard.edu/people/julian-gautier>
- Waffle
 - We are now adding "story points" to items in Waffle. You can see a sum at the top of each column.
 - Story Points and Agile Estimation:
 - <https://www.atlassian.com/agile/estimation>
- Questions
 - (Amber) Prioritizing from the community. Is this call a way to have the community help?
 - (Danny) Each release will have a priority such as IP Groups for 4.5.1. Any avenue can be a great way for the community to give input on priorities.
 - (Amber) Do you use Jira?
 - (Danny) No.
 - (Amber) Can I create issues via Waffle?
 - (Danny) Yes.
 - (Amber) We have a need to move dataverses and datasets.
 - (Gustavo) We're probably more likely to add a superuser API first and build a GUI later. This would at least mean you don't need to hack on the database manually.
 - (Phil) Here are some related issues:
 - Moving Dataverses + Datasets: Provide way in the UI for a user to do this · Issue #2073 · IQSS/dataverse - <https://github.com/IQSS/dataverse/issues/2073>

- Move Dataset: Allow super user to move a dataset to another dataverse, one at a time. · Issue #2226 · IQSS/dataverse - <https://github.com/IQSS/dataverse/issues/2226>
 - Move Dataverse: Allow super user to move a dataverse and reindex it and all child objects. · Issue #2278 · IQSS/dataverse - <https://github.com/IQSS/dataverse/issues/2278>
- (Sherry) Working in metadata mudwrestling but may have questions soon as she upgrades from 4.3.
 - Some discussion of this issue: alternativeURL Metadata Field should be Clickable · Issue #3337 · IQSS/dataverse - <https://github.com/IQSS/dataverse/issues/3337>
- (Amber) Working on mapping metadata fields from DVN 3.x to Dataverse 4. Can the community collaborate on how this mapping is done in a Google doc or whatever? Problems with "Funding Agency" and other fields. We don't want to lose anything while upgrading.
 - (Gustavo) The migration of metadata is done in Java code rather than an SQL migration script.
 - (Gustavo) Related issue: v3.6 Metadata field Funding Agency(fundAg) not migrating to v4 · Issue #3323 · IQSS/dataverse - <https://github.com/IQSS/dataverse/issues/3323>
- (Slava) My users are interested in statistics on the installation and dataset.
 - (Danny) In 4.7 "dashboard" release we plan to show metrics for superusers.
 - (Danny) There's a new metrics application that will be live on dataverse.org soon. The code is at <https://github.com/IQSS/miniverse>
- (Slava) Can a dataset have both a Handle or a DOI? We'd like support for two Handles or a Handle and a DOI.
 - (Phil) Only one value can be stored at a time. "identifier", "protocol", and "authority" at <http://phoenix.dataverse.org/schemaspy/latest/tables/dataset.html> . This is what appear in the URL of a dataset.
 - (Gustavo) You can use the "Other ID" field to store the non-primary ID.
- (Amber) Any update on how the citation changed? Which Dataverse should display in the citation - Google Groups - <https://groups.google.com/forum/#!topic/dataverse-community/xnB2lComOrs>
 - (Danny) Thanks for the reminder. Will work with others on this.
