

Cloudinary Setup in n8n

What You'll Need:

- A Cloudinary account
- Access to your n8n workflow editor

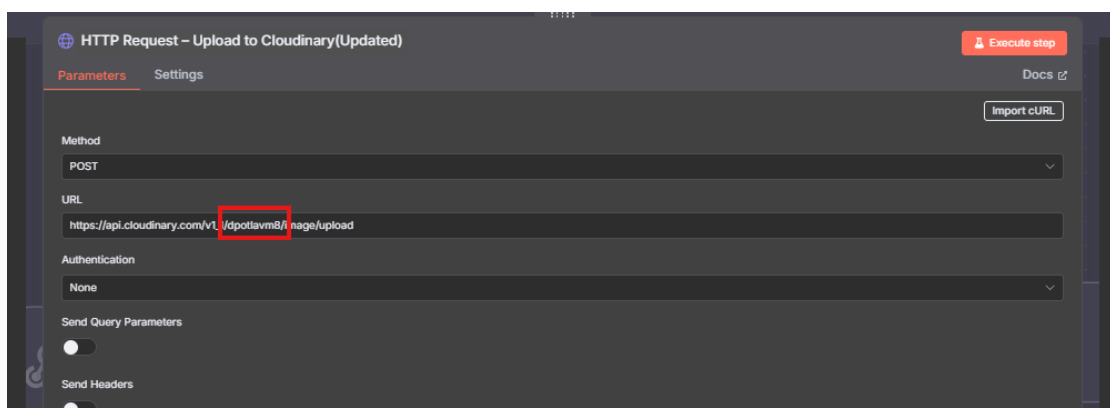

Step 1: Set up Cloudinary

1. Sign up for Cloudinary. Visit <https://cloudinary.com> and create an account.
2. Go to Upload Settings
 - After logging into Cloudinary, navigate to Settings > Upload > Upload Presets.
3. Add Upload Preset
 - Add a new Upload Preset with the following settings:
 - Signing Mode: Unsigned
 - Name: e.g., n8n_upload
 - Folder (optional): n8n
4. Click Save to store the settings.
5. Copy the cloud name

Step 2: Update Cloudinary info

1. On the workflow “Step 3: Post contents to Instagram”, node “HTTP Request – Upload to Cloudinary(Updated)”, update the cloud name created from Step 5:

Done!

You can now upload images to Cloudinary!
