Darren Mischel, Principal

February 10, 2023

Our school will be participating in survey data collection using the New Jersey School Climate Improvement (NJ SCI) Survey, which was developed, and is administered, by Rutgers University in order to help schools obtain multiple perspectives on aspects of school climate. Collecting data is important for understanding strengths and needs in our school and how it feels to be a member of the school community. A letter with instructions on how to take the parent and caregivers survey will be sent soon. Your voice is important to us and we hope you will participate.

School and district staff will be able to view responses from the survey on a password-protected online platform. The data will be used to make improvements to the school. This survey is anonymous and voluntary. Individual responses on the survey are combined for reporting purposes by group. For example, your answers on the survey will be combined with those of other parents. No one will have access to individual respondent's answers.

Administration of the student survey will take place from 02/21/2023 - 03/03/2023. Preview the items on the student survey(s) here : **Students Grades 3-5 Survey** This is a chance for us to learn about your child's opinions about the school, but your child does not have to participate in the survey. If you prefer that your child not participate in the NJ SCI survey, please email your child's homeroom teacher.

If you do not respond, it will be deemed that you approve for your child to participate in the survey if your child chooses to participate.

Best regards,

Darren Mischel, Principal
