

The Committee for Humane Geese Control is pleased to report our Canada Goose addling results for Spring 2024.

We found 14 goose nests on Greenwood Lake and addled 90 eggs.

Nest 1 Fncf	7 eggs	Addled on 4/13
Nest 2 Gwlm	8 eggs	Addled on 4/15
Nest 3 RI	8 eggs	Addled on 4/15
Nest 4 JSBR	6 eggs	Addled on 4/15
Nest 5 NABL	7 eggs	Addled on 4/6
Nest 6 NALBL	8 eggs	Addled on 4/25
Nest 7 MP	5 eggs	Addled on 3/25, 4/6
Nest 8 BBC	6 eggs	Addled on 4/15
Nest 9 GWP	7 eggs	Addled on 4/18, 5/7
Nest 10 Edge	7 eggs	Addled on 4/15
Nest 11MinFT	5 eggs	Addled on 4/6, 4/27
Nest 12 Rnbw	6 eggs	Addled on 4/15, 4/27
Nest 13 Lakes	4 eggs	Addled on 4/15, 4/27
Nest 14 Earm	6 eggs	Addled on 4/25

Canada geese come back to the body of water they were born on to nest every year. We have addled over 300 eggs over the last 5 years. If you do the math you will see that we have stopped thousands of geese from being born here over the next 10 years and staying here 5 months until the goslings can fly.

Geese are pondhoppers and the numbers will fluctuate daily. We can further reduce the numbers by blocking access to food and they will move on. Since we live under the Atlantic Flyway there are always going to be geese stopping here and there are always going to be new geese willing to move in if there are no resident locals to resist. Our goal is to reduce the number of resident geese over time and teach molting/pondhopping geese that they cannot find food here.

We are also offering free services to residents and businesses educating them on what to do to keep them off their property. If they can't find food on our lake, they will move on. Please refer all future inquiries to us and we will work with them directly.

If you have any questions, please let us know.

Regards,

Joyce and Michelle
