

## **Grade 2 Coding Course B**

### **Success Criteria:**

- I can create a coding program.

### **Learning Intentions:**

- I am learning standard block based programming actions such as: clicking, drag and drop, etc.
- I am learning to build a computer program from a set of written instructions.
- I am learning to construct a program by reorganizing sequential movements.
- I am learning to break down a long sequence of instructions into the smallest repeatable sequence possible.
- I am learning to identify bugs in an existing program and assess how to correct them.
- I am learning to create a program that draws complex shapes by repeating simple sequences.
- I am learning to decompose a shape into its largest repeatable sequence.
