

GAME REVIEW

You will write a short 2-3 page game review, about 500-750 words.

You should check out at least three other game reviews online before starting.

You can look at [Kotaku](#), [Game Spot](#), or [IGN](#), among others.

Pick a game that you think you might like, or not...

Play the game for a while... (beat it if possible???)

Jot down descriptive words somewhere for yourself, or any aspects that stand out.

Then boil it down.

Try to have an overarching claim.

Then write. And write for a popular audience.

Here are some tips for writing a good review: [from Gamer Sushi](#), and [from a freelance writing website](#).

You may play with font and add an image which may affect your page count.

No need for a works cited page.

Cite any popular references in an informal way as you would read in another popular article.

Post it to your blog and turn in a hardcopy to me on Wednesday, March 2.

Think about how you are going to make it thoughtful, polished, and interesting.

Worth 30 Points.
