

## **SDSCPA 4 Point Strategy for increasing student achievement using the framework of Marzano High Reliability Schools and ACCPAS**

### **1. We will support ongoing, strategic data-driven Professional Learning Communities(PLCs).**

#### **(Marzano Level 1: Safe and Collaborative Culture)**

- Educators meet and implement strategic improvement plans in content departments and grade-level teams.

### **2. We will implement intentional literacy strategies in every classroom, every day.**

#### **(Marzano Level 2: Effective teaching in every classroom)**

- Educators will design and implement differentiated learning experiences that engage students in critical thinking through collaboration and creativity. With a focus on lifting the cognitive load, students will read, write, listen, and speak using appropriate disciplinary language. All educators will post and refer to a clear, student-friendly learning target every day in every classroom.

### **3. We will implement a culturally responsive Guaranteed Viable Curriculum (GVC), Assessment, and Instructional practices.**

#### **(Marzano Level 3: Guaranteed and Viable Curriculum)**

- Educators align curriculum and instruction to meet the diverse needs of ALL students. Educators will differentiate learning based on the unique learning needs of our students. Our educators will love and lift students to accelerate learning in a compassionate, supportive, and culturally responsive way.

### **4. We will increase access to high-quality teaching and learning in the arts. Arts are the intervention.**

- Students will have increased access to engage in arts learning in academic and art settings. Access will include before, during, and after-school programming.
