

Hello!

I recently came across your plumbing business and noticed it has great potential.

Upon visiting your website, I was impressed with the amount of knowledge you offer to your audience.

However, as a media marketing expert, I couldn't help but notice that you could reach a larger audience in your area.

As a Minnesotan myself, I can help you GROW your business though fixing your website and creating insightful social media posts.

A good way to take advantage is by running an Instagram account and posting/ running ads to grow your following and get more sales.

Having worked as a social media marketing specialist, I have hands-on experience in crafting engaging and conversion-focused posts that captivate audiences, and ultimately boost conversions and sales.

I have made a plan to create some social media ads and also fix up your website.

I can send you my portfolio and create samples for you. If you don't like it then it's all good.

If you're open to exploring this opportunity further, I'd be delighted to schedule a zoom call to discuss the details and how we can tailor my services to meet your specific needs. I'm certain that together we can take your brand to new heights.

All the best,
Ali Ahmed
