

2025-2026 Back to School Supply List

Please see below a list of school supplies your child will need for this school year. We kindly ask that you try to buy what is on the list especially if it is a specific brand. It is because other brands have not worked out as well in the past. On the Amazon lists there will be multiple items that are the same, this is just to give you another suggestion or option if the style or size is not available.
