Dear Parents,

RE: ySafe and SCHOOLNAME Partnership

It is ySafe's pleasure to present a bespoke Digital Wellbeing Program to SCHOOLNAME. ySafe's online safety experts have designed an innovative online safety program, which will support your student's ongoing digital development.

This ecosystem of online safety education will be delivered to students and the broader school community, via the following:

- A series of curriculum-linked lesson plans for students, which together intensively explore online safety in our digital world.
- Parent educational sessions and access to the Online Safety Hub resource.
- Evidence-based staff professional development, examining the nexus between online safety and student social and emotional wellbeing.

Who are we?

ySafe is Australia's leading provider of online safety education programs and support services. Our award-winning team of clinical psychologists, primary and secondary educators, and police officers have first-hand experience with the challenges faced by students, schools, and parents online.

Drawing on case studies and research from our respective backgrounds, we are committed to providing engaging and practical education programs that focus on the development of positive digital citizens rather than the perils of technology. But most importantly, we collaborate with students, parents, and school executives to ensure our sessions reflect #trending online behaviours, platforms, and risks.

Upcoming Workshop

The upcoming workshop will cover the following topics. This workshop is supported by a series of pre/post workshop resources delivered by the teachers.

Year 11 Topics	Learning Intentions
Digital Footprint & Online Scams	<ul style="list-style-type: none">Identify how personal information online can be used by scammers to create targeted scamsExplain how scammers target our emotions, desires or lack of knowledge to persuade us to respond in certain ways
Risks of Online Gambling	<ul style="list-style-type: none">Explain how aspects of gambling are embedded in popular online platforms used by children and teensExplore the psychological processes that affect gambling behaviours

Partnering with Parents

It is ySafe's goal to further support students by empowering parents with topical awareness and some practical strategies which will allow the discussion to continue at home. This is done by means of the Online Safety Hub.

Online Safety Hub: <https://HUB.onlinesafetyhub.com.au>

The Hub is a unique tool that provides school communities with up-to-date, expert information and advice about online safety on one central platform.

Topic specific articles for the Year 11 parents

How to spot a fake online account.
