

Compat research for grouping property changes to TransformInterop

<https://phongcachmoc.vn/>: has isolation and transform-style:preserve-3d on an img element with no children. No effect.

<https://jobuae1.blogspot.com/>: on an element that appears to reveal via a clip-path + clip, transform-style: preserve-3d, even though the children don't have 3d transforms

<https://www.accordinistefano.it/>: on a container element that may be attempting parallax, but has blend mode somewhere. Parallax still works.

<https://www.theeastafrican.co.ke/>: couldn't get the use counter to trigger

<https://bogor.tribunnews.com/>: couldn't get the use counter to trigger

<https://ebcbrakes.com/>: parallel wrapper w/ mix-blend-mode: multiply. Same library perhaps as the Italian site above.

<http://plectrum.ch/>: transform-style: preserve-3d with mask and translateZ(0) children; no effect

<http://twitter.pl/>: CSS clip and transform on a bunch of divs with no children

<https://minecraftpe-mods.com/>: can't get the use counter to trigger

<https://consciousgood.com/>: screen-reader-text element with no children has transform-stye: preserve-3d
