

Outdoor Professional Supervision Assignment

You are asked to view the virtual ECE outdoor environment provided below with a professional supervision lens. Once you have viewed the virtual ECE outdoor environment, you are asked to identify and provide a rationale to note why these environment items/objects are hazards to the setting or concerning from a professional supervision perspective. Students will then connect each noted area to provincial legislation (CCEYA, 2014) and/or the Code of Ethics and Standards of Practice related to professional supervision (CECE, 2017).

Please ensure that you have completed all areas in the table.

Note: your connection in the final column is simply the reference to the document(s) that you use to support your rationale. A lengthy description is not required as you have already noted the reason in the rationale column. A sample of the expectation has been provided in the chart for clarity.

Name the environmental hazard or object of concern	Provide a rationale. Why is the object or item an issue in your own words	Connect your response to a specific legislation component, Standard of Practice, or impact to the Code of Ethics
Example: entry/exit gate	an unsecured or damaged entry/exit gate poses a risk	Standard III: C.2 and C.5 Ontario Regulation 137/15 Subsection 3.18 - Playground Safety Policy Special Instructions 1) Daily Inspections

Name the environmental hazard or object of concern	Provide a rationale. Why is the object or item an issue in your own words	Connect your response to a specific legislation component, Standard of Practice, or impact to the Code of Ethics
