**IV. READING (3 pts)**

**1. Read the passage below carefully and Choose T (True) or F (False). (1 pt)**

The Harry Potter film series is famous all over the world and is loved by children, teenagers and adults. It's based on the books by JK Rowling. The first film, Harry Potter and the Philosopher's Stone, was released in 2001. The whole series consists of eight fantasy films. In each film the main character, Harry, is played by Daniel Radcliffe.

The story begins when 11-year-old orphan Harry discovers that his parents were wizards and he starts his education in magic at Hogwart's School of Witchcraft and Wizardry. There he makes two close friends, Ron and Hermione, who share his adventures. Each film ends dramatically, often with a battle between Harry and his worst enemy, the evil wizard Lord Voldemort. As well as Harry, Ron and Hermione, there's a huge variety of characters, including students, professors, dark wizards, ghosts and fantasy creatures. Non-magic people are called Muggles.

The special effects of the films are amazing and make magic seem completely possible! Different techniques were used to create the effects that make the actors look as if they're flying. The films are imaginative, funny, frightening and, of course, magical! If you like adventure and magic, you'll love the Harry Potter films!

31. The Harry Potter films are well-known in the world.  
32. Harry discovers that his parents were wizards when he's 11.

33. Harry's best friend is Lord Voldemort.
34. People who aren't magic are called Muggles.
35. People who like adventure and magic won't like the films.
