

PROMISED LAND DISC GOLF COURSE

at Ted Williams Camp

Community Partnership & Sponsorship Overview

Phase I: A nine-hole public disc golf course with short and long tee options

Lakeville Disc Golf Association, Inc. | Lakeville, Massachusetts

The Project

Promised Land Disc Golf Course is a community-led effort to establish a permanent public disc golf course within Ted Williams Camp. Phase I is planned as a nine-hole layout with both short and long tee locations, allowing new players, families, experienced players, and league participants to use the same course at an appropriate level of challenge.

Lakeville Disc Golf Association, Inc. | Promised Land Disc Golf Course

9	18	10
Phase I holes	Short + long tee locations	9 course baskets + practice basket
\$12,000	\$500	Public
Approx. Phase I project goal	Founding hole sponsorship	Community recreational use

Why it matters

- Adds another low-cost outdoor recreation option at an existing Town park.
- Creates a course that can serve beginners and experienced players through dual tee locations.
- Encourages repeat park use, walking, outdoor activity, and community participation.
- Uses volunteer labor, grants, sponsorships, and donations to stretch every public and private dollar.
- Creates opportunities for local businesses to be visibly connected to a lasting community amenity.

Where the project stands

The project is beyond the concept stage. A preliminary nine-hole routing has been developed, existing site conditions have been photographed, volunteer clearing has begun, and individual holes have been evaluated for tee, fairway, and basket locations. Hole 1 is currently the most advanced area, while several other holes require selective clearing, site preparation, and final field adjustments.

From Plan to Course

Hole 1 - clearing and putting area

Hole 3 - greatest site-preparation need

Hole 6 - proposed long tee area

Hole 7 - proposed green area

What support will help complete

- Permanent baskets and installation materials
- Tee construction and base materials
- Selective brush clearing and site preparation
- Tee signs, course map, directional and safety signage
- Welcome-area improvements and sponsor recognition
- Equipment, materials, and professional services that reduce cash construction costs

The goal is not simply to purchase equipment. It is to combine community labor, local business support, private donations, grants, and Town coordination into a durable recreational asset.

Phase I - Hole-by-Hole Snapshot

Hole 1	The most advanced hole to date. Volunteer work has created a largely cleared playing area with long and short tee concepts already identified.
Hole 2	Transitions from Hole 1 toward the library-side wooded area. Final placement will emphasize visibility, safe player flow, and clear wayfinding.
Hole 3	The largest remaining site-preparation challenge and a strong opportunity for an in-kind clearing or equipment partner.
Hole 4	Moves back into a more open area before finishing near the edge of the woods, requiring comparatively limited additional clearing.
Hole 5	Uses the open field area with multiple basket-routing options being evaluated to balance challenge, park operations, and flow.
Hole 6	Envisioned as a signature, highly visible hole near the Precinct Street side of the park, with final placement subject to safety buffers and field review.
Hole 7	Primarily uses an existing wooded/open corridor and is expected to need only selective volunteer clearing near the proposed green.
Hole 8	Two potential routing concepts are being evaluated. The final route will prioritize safe circulation, environmental considerations, and a smooth transition to the finishing hole.
Hole 9	Proposed in the area behind the horseshoe section, with tee positioning and the final wooded edge to be confirmed through field and conservation review.

Planning note: The routing remains preliminary. Final tee and basket locations will be adjusted where necessary based on field conditions, park operations, safety review, environmental considerations, and Town requirements.

Ways to Partner

Founding Hole Sponsor - \$500

Support one of the original nine holes. Recognition is planned on both the short- and long-tee signage, with founding-sponsor acknowledgement on the course welcome area and project communications. The sponsorship term is three years.

Course / In-Kind Partner

Businesses with clearing, landscaping, excavation, aggregate, lumber, printing, signage, equipment, or construction capabilities can make a major impact through donated or discounted goods and services. Recognition can be tailored to the scope of support.

Community Donor

Individuals and organizations can support permanent course infrastructure, signage, practice-area improvements, and other capital needs. Every contribution helps reduce the amount that must be raised through a single source.

What a partner is helping create

- A permanent public recreation amenity at Ted Williams Camp
- A beginner-friendly and experienced-player-friendly layout
- A visible community project supported by volunteers and local businesses
- A course designed for long-term use and stewardship rather than a one-time event

A Short Introduction for Sponsors & Donors

We are building the Promised Land Disc Golf Course at Ted Williams Camp as a permanent public recreation amenity for Lakeville. The first phase is a nine-hole course with both short and long tee locations so it can work for families and beginners while still being enjoyable for experienced players. We have already completed the preliminary routing, documented the site, begun volunteer clearing, and developed a project budget and fundraising plan.

The course is being built through a mix of community fundraising, local business sponsorships, grants, donated materials and services, and volunteer labor. That is where local partners can make a real difference. A \$500 founding hole sponsorship helps support the original nine-hole build and provides long-term recognition on the course. We are also looking for businesses that may be able to assist with clearing, materials, equipment, construction, printing, or other in-kind support.

Our goal is to create something that will remain here for years: a free public outdoor activity that brings people into Ted Williams Camp, encourages recreation, and gives local businesses and donors a direct connection to a visible community improvement.

Thank you for considering a partnership with Promised Land Disc Golf Course.
