

# NEW HAVEN INNOVATION COLLABORATIVE

**To steer our new grants, we believe that our strategies should be:**

- collaboratively developed
- well understood
- open to critique and improvement
- accountable to the public

## **Draft Strategy Template**

### **What's going on?**

What current conditions or emerging trends are shaping the ability of residents to develop entrepreneurial solutions?

### **What should be done about it?**

What would make it easier for residents to develop entrepreneurial solutions to meet that opportunity or challenge?

### **Who does that plan affect?**

Who benefits from those changes? And might anyone be harmed (even indirectly)?

### **Who needs to do it?**

Who should be involved in developing those changes? Who should be involved in implementing them?

### **How do we tell if it works?**

What specific thing can we watch to see if we're making progress?
