Abstract

Abstract is a summary of the contents of a report or manuscript written briefly and concisely in 250 – 400 words. Contains the main problems, objectives, methods and research results written in English paragraphs. Abstract is typed using Cambria font, font size 11, single line spacing and alignment justify.

1. INTRODUCTION (Cambria 12, Bold)

The introduction outlines the background of the research, the objectives, as well as a review of previous research relevant to the study being conducted and recent research that distinguishes it from earlier studies. Type using Cambria font, size 12, with single line spacing and a single-column layout, using english. The maximum length for the manuscript is fifteen pages. This template can be used immediately without changing the font format, font size, spacing, or page margins. Write an article in English.

2. METHOD

The research methodology section covers the methods or approaches, procedures, instruments, data collection and analysis techniques, as well as other matters related to the research implementation process. The following outlines the formatting guidelines for sub-subheadings, figures, tables, and equations.

2.1. Figure and Tables

Figure numbering and names are typed below the figure, whereas table numbering and titles are typed above the table. Tables and figures are numbered sequentially starting from 1, typed in Cambria 11 with 1,15 line spacing. Place the image in the center; aim for a small size while ensuring it remains clearly visible. The table is also

Accepted ddmmyy ; Available online ddmmyy

centered, using Cambria 11 font with single line spacing, and the column headers are in bold. Examples of the placement and formatting of figures or tables can be seen below.

Table 1. Table Title

Column Name	Column Name	Column Name
Frist row	x	x
Second low	x	x
Third row	x	x

Picture 1. UNHASY Logo

2.2. Formula

Formulas should be typed using Microsoft Equation Editor or MathType and numbered.

Mean Formula

$$Mean(x) = \frac{\Sigma(f_i x_i)}{\Sigma f_i} \quad (1)$$

3. RESULTS AND DISCUSSION

The results and discussion section details the research findings obtained, presented in the form of either figures or tables.

4. CONCLUSION AND SUGGESTION

The core research findings may be presented in paragraph. Additionally, provide suggestions for future research.

ACKNOWLEDGEMENTS

The acknowledgments section of a written work is used to express appreciation to individuals, lecturers, institutions, or sponsors who have contributed to the research and writing process.

FUNDING INFORMATION

Funding information refers to data or details regarding the sources of funding, financial support, grants, or sponsorships that support an activity, project, business, or research publication.

AUTHOR CONTRIBUTIONS STATEMENT

A brief section in a scientific article or journal that outlines the specific roles and contributions of each author to the research.

CONFLICT OF INTEREST STATEMENT

A written statement from the authors of a scientific journal article declaring whether they have any financial, personal, or professional relationships that could influence or be perceived as influencing the research results.

DATA AVAILABILITY

Please state whether the research data are publicly accessible or not. If the data are publicly accessible, specify where the data are stored.

AI USE AND DECLARATION OF GENERATIVE AI USE

Please state whether or not Artificial Intelligence (AI) technology was used in the preparation of the scientific work. If AI was not used, state this explicitly. If AI was used, specify the name of the AI technology and explain its role in the preparation and writing of the scientific work. Furthermore, clearly state the author's responsibility for ensuring the originality, authenticity, and academic integrity of the scientific work.

5. REFERENCES

The bibliography lists all references cited in the manuscript. he reference list must consist of sources published within the last 10 (ten) years, totaling 25 references, with the requirement that 80% are journal articles and one cited article is from Elconika. The bibliography is compiled using the Mendeley or Zotero application. Citations and references must strictly follow the IEEE style. Citing unofficial websites, blogs, and the like is not permitted. The following is an example of citing sources using the IEEE style.
