

6/29/21 - 9:25-10, then 10:20-12:00

Met with Steve Booth to talk about how I can be of help in the MacBook Air roll out

- Every mac book is put into a document that has the following information
 - Serial # (tied to the motherboard)
 - Mac Address (tied to the wireless card)
 - Generic Name (ex. JMH-CKutteroff)
 - Asset Tag (linked to a bar code with ESASD)
- NAC (Network Access Controller)
 - We use Fortinac (big distributor)
 - All districts have a NAC
- JAMF Pro Dashboard
 - what is broken right now
 - It is broken because the new operating system on the Macs does not talk to the server
 - This dashboard controls the operating system
 - Tracks what is downloaded
 - Sharp copier connections
 - Tracks who is logged in
 - Controls the back end and licensing
- Apple Remote Desktop
 - Helps the building technician
 - Pops into computers and takes over
- SCCM (Software Configuration and Control Manager)
 - Windows machines use this
 - Goes into policies, firewalls, and security
- Imaging couldn't happen today, but Steve is trying to get to the bottom of it with Manvel
 - Security controls
 - Image of the actual computer and hard drive
 - Locks stuff that employers may not want people to get into.

Nicole Meeting - 6/29/21 - 10:00-10:20

5 clubs

- Engineering
 - Matt Trapp
 - Can use me for making a slide show for the kids
 - Can help him make things easier
 - Grade 3-5
- Olympic STEM
 - Grades K-2

- Sports Club
 - Grades K-5
- Arts Club
 - Grades K-2
 - Technology-wise may need my help
- Media Club
 - Grades 4-5
 - May need some help with this

Design team did all of the morning activities already

Meeting tomorrow will help clear up how I can help

6/30/21 - 10 am

Offered my services, told them first come, first serve.

Told them what I can do, and gave them my phone number and email address
