

Aetna SHIP “gender reassignment” surgeons in network 2021-22

It is important to have an experienced surgeon who can privately and sensitively handle gender reassignment surgery. This designation makes it easy to find the surgeon who fits your needs. Each surgeon is shown with the type of surgery they perform.

What do I need to do? The designated surgeons are in our network, but you should make sure both the surgeon and the facility (hospital or ambulatory/outpatient surgical center) are in-network for your benefit plan. It is important that you check this before your surgery is performed. Checking can help you avoid out-of-network costs.

Chest Surgery (Female to Male – bilateral mastectomy)
