

Parents who suspect their preschool-age child may have special needs may obtain free help from their local school district's Child Study Team.

The Upper Township Child Study Team conducts Child Find Preschool Screenings throughout the school year at Upper Township Primary School. Child Find is a service that locates and provides recommendations for those children ages 3 to 5 who may have physical, cognitive, language, social, or emotional difficulties.

For children birth to 3 years of age, information is also available on how and where to obtain services.

Consider a preschool screening with the Upper Township Child Study Team if your child appears to have one or more of the following signs:

- Significant delays in acquiring language
- Significant difficulty walking, running, or manipulating small objects
- Frequent health problems or disabilities present from birth
- Consistent trouble seeing or hearing
- Significant difficulty playing appropriately with other children

Screening and professional guidance are available through the Child Study Team.

For more information or to schedule for the next preschool screening the School Social Worker, Jill Clark, at clark.jill@upperschools.org.
