

District LWP Compliance Tracker

Purpose: This dashboard template provides a centralized way for districts to track Local Wellness Policy (LWP) role assignments across all schools. It ensures up-to-date information on who is responsible for LWP compliance at each site, supporting communication, onboarding, and accountability.

Directions: Customize this dashboard to reflect your district's schools and structure. Maintain it at the district level and update it as new role assignments are made, confirmations are submitted, or changes occur. Review regularly to ensure all schools have a designated point of contact for wellness policy implementation.

Example Format:
