

Ironworker Dashboard

Entity	Open Source Ecology
Project Name	Ironworker Machine
Version	Prototype 3
Completion Status	Prototype Stage
Version Date	11/2013
Terms of Use	GPL / CC-BY-SA
Summary	A device that can instantly cut steel and punch holes in metal thicknesses of 1".
Keywords	fabrication, custom fabrication, workshop, hole puncher, metal shear, angle shear
Description	The Ironworker Machine is a heavy-duty, semiprecision machine that is the backbone of any custom fabrication shop. OSE is using its modular construction techniques for the Ironworker, to integrate this machine within the rest of our modular workshop infrastructure.
Predecessors	Prototype 1 - Hole Puncher, Prototype 2 - Plate and Angle Shear.
