ABSTRACT

This paper provides a template for preparing papers for electronic production of the Journal. A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings and conclusions. The Abstract should be 150 to 250 words in length. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate our article.

1. INTRODUCTION

Introduction includes background, theoretical basis, problems, problem solving plans and research objectives. The introduction is written using Cambria letters, size 10, space 1 and line spacing 1 cm. Text is typed in a print area with margins from top, bottom, left, right made 2.5cm. A4 paper size, 8.27-inch-wide, 11.69 inch high. Layout: 0.5-inch header, 0.5-inch footer. The text does not need to be page numbered. (Aditya Dharma, 2019; R. N. K. Rambe, 2018).

1.1. Article Type

Articles are original articles of research results or review results from previous articles. Articles can be written in Indonesian or English. The number of pages of articles between 10 - 12 pages include a list of references. The systematic writing of the research article consists of title, author's name, institution and correspondence address, abstract, keywords, abstract, keywords, introduction, methods, results and discussion, conclusions and suggestions, gratitude and reference list. (Aditya Dharma, 2019; R. N. K. Rambe, 2018). The systematic conceptual article writing (containing the results of the review) consists of the title, author's name, institution and correspondence address, abstract, keywords, abstract, keywords, introduction, core part, summary and list of references. The title of the article is written using 16 size Cambria letters, capitalized, bold, Align Right, consisting of a maximum of 15 words and describing the contents of the manuscript. The author's name is written using the size 12 letters Cambria not accompanied by a title, the first name is abbreviated while the last name (surname) is not abbreviated. Names of authors from different agencies are marked using a superscript behind the name. Manuscripts are presented narratively (without numbering in front of subtitles) and presentation in the form of subtitles is avoided. The formula is written separately not in the sentence and equipped with numbering on the right. The formula is written using Microsoft equation.

$$x + y = 2 \quad (1)$$

The picture is inserted in the text box and the figure caption is placed below the image. The caption of the image is numbered and the image must be referred to in the text. Captions begin with uppercase letters. Captions of images with more than one line are written using line spacing 1. The image is drawn with a line width of 1pt and should have good contrast quality.

*Corresponding author.

Figure 1. Plots of lineation (*L*) and FeO content showing negative correlation

The table is created with a line width of 1pt and the table caption is placed above the table. Information on tables consisting of more than 2 rows is written using 1 line spacing. The table lines are only horizontal lines while vertical lines are omitted. Example of how to write [Table 1](#).

Table 1. Results of Curve-Fitting Analysis Examining the Time Course of Fixations to the Target

Logistic parameter	9-year-olds		16-year-olds		<i>t</i> (40)	<i>p</i>	Cohen's <i>d</i>
	<i>M</i>	<i>SD</i>	<i>M</i>	<i>SD</i>			
Maximum asymptote, proportion	.843	.135	.877	.082	0.951	.347	0.302
Crossover, in ms	759	87	694	42	2.877	.006	0.840
Slope, as change in proportion per ms	.001	.0002	.002	.0002	2.635	.012	2.078

Note. For each subject, the logistic function was fit to target fixations separately. The maximum

2. METHODS

Contains how data is collected, data sources and ways of data analysis.

3. RESULTS AND DISCUSSIONS

Results

Results are the main part of scientific articles, containing: final results without data analysis process, hypothesis testing results. Results can be presented with tables or graphs, to clarify the results verbally.

Discussion

Discussion is the most important part of the entire contents of scientific articles. The objectives of the discussion are: answering research problems, interpreting findings, integrating findings from research into existing sets of knowledge and composing new theories or modifying existing theories.

4. CONCLUSION

Contains conclusions and suggestions. Conclusions include answers to research questions. Suggestions refer to the results of the study and take the form of practical actions, mention to whom and for what advice is intended. Written in essay form, not numerical form.

5. ACKNOWLEDGE

If any, thanks are addressed to official institutions or individuals who have provided funding or have made other contributions to the research. Acknowledgments are accompanied by a research contract number.

6. REFERENCES

The references consist of the author's name, year of publication, article title, city name and publishing institution. The reference list is sorted according to the first letter of the author's name (A-Z). The second word in the name agreed as a family name. Authors may follow the APA 7th Publication Manual to write references. All references referred to in the text must be written in the reference list. Preferred references are articles taken from the latest journals / publications no later than 5 years before article submission (paper submission). Example of how to write references:

Suparman, M. A. (2012). *Desain instruksional modern*. Jakarta: Erlangga.

Sulianto, J., Purnamasari, V., & Febriarianto, B. (2019). *Pengaruh Model Pembelajaran Think-Pair-Share terhadap Hasil Belajar Siswa Kelas V (Lima) Materi Organ Tubuh Manusia dan Hewan* [The Effect of the Think-Pair-Share Learning Model on Student Learning Outcomes in Class V (Five) Material on Human and Animal Organs], *Internasional Journal of Elementary Education*, 3(2), 124–131. <https://doi.org/10.23887/ijee.v3i2.18515>.
