

CALL SCRIPT *if your delegate has not yet contacted DEQ*

Hello,

My name is _____ and I live in _____ city/county. I am calling to ask you to stand up for clean water in Virginia and press the DEQ to do a full review of the potential impacts the Atlantic Coast and Mountain Valley pipelines would have on our Virginia water resources under the Clean Water Act 401 certification. On behalf of your constituents and clean water for all Virginians, I ask that you send a letter to DEQ requesting them to:

- Suspend the comment period and all public hearings until the information necessary to consider the impacts to groundwater supplies is gathered as recommended by the VA Department of Health and other stakeholders.
- Properly assess all risks to Virginia's springs, streams and rivers, through individual CWA Section 401 reviews of the ACP and MVP proposals.

Thank you for your time and consideration. This issue is extremely important to me.

If your legislator is on the list below, they have already called on DEQ to slow down and take the time to do a full review! Make sure to thank your delegate for the support and encourage them to keep the pressure on DEQ!

Who has already contacted DEQ about the clean water act certification?

- Delegate Dickie Bell
- Delegate David Toscano
- Delegate Joseph Yost
- Delegate Greg Habeeb
- Delegate Sam Rasoul
- Delegate Steve Heretick
- Senator Mamie Locke
- Senator Lynwood Lewis

CALL SCRIPT *if your delegate has already contacted DEQ*

Hello,

My name is _____ and I live in _____ city/county. I want to thank Delegate/Senator _____ for the action she/he took to protect our communities and one of our most important resources; our water. Thank you for sending a letter to the DEQ urging them to use their full authority to do a stringent review of the potential impacts the Atlantic Coast and Mountain Valley pipelines would have on our Virginia headwater streams, rivers, and wetlands. However, as a concerned citizen I have been unable to properly comment on plans

that have not been released. Therefore, I urge you to demand that the DEQ suspend the comment period and all public hearings until the information necessary to consider the impacts to groundwater supplies is gathered as recommended by the VA Department of Health and other stakeholders.

Thank you again.
