

# Launchdio Email Swipes

Copy. Paste your link. Send.

## HOW TO USE THESE

10 emails below. Each one is a complete, ready-to-send email. Replace [YOUR LINK] with your affiliate link. Replace [YOUR NAME] with your name. Send.

Send them as a sequence (one per day or every other day) or pick the ones that fit your audience. They work in any order.

**Don't overthink it. Don't rewrite them. Just send.**

## EMAIL 1 — The Opener — Curiosity

**Subject: this thing does something kinda wild**

Hey —

Quick one for you.

I found a tool that does something I haven't seen before.

You tell it what you want to sell — a children's book, a t-shirt design, a digital download, a brand kit, a printable planner, whatever.

And it just... builds it.

Not a mockup. Not a "starting point." The actual thing. Ready to publish. Ready to list. Ready to sell.

No prompting. No design skills. No Photoshop.

You describe it like you're talking to a friend, and you get back something that looks like a professional made it.

It's called Launchdio.

They have a free training on the page that shows 10 methods people are actually using to make money with AI content.

**EMAIL 2** — The Free Training Push

**Subject: free training — 10 AI money methods (no opt-in)**

Hey —

Yesterday I mentioned Launchdio.

Today I want to tell you about the free training on their page.

It's 20 minutes. Shows you 10 real methods people are using to make money with AI-generated content right now.

KDP books. Print-on-demand. YouTube Shorts. Etsy digital downloads. Printable journals. AI art packs. Digital portraits.

Real examples. Real revenue numbers.

No opt-in. No catch. You just watch it.

Why am I telling you about a free video?

Because once you see what's possible — and how much work it normally takes to do it manually — you'll understand exactly why Launchdio exists.

And why it's worth way more than they're charging.

Here's the page:

Scroll down a bit. You'll see the training. Watch it.

**Subject: the part nobody tells you about AI side hustles**

Hey —

You know all those videos about making money with AI?

KDP books. Print-on-demand. YouTube Shorts. Etsy digital downloads. Printables. Digital art.

The methods work. That's not the issue.

The issue is what happens when you actually sit down to do it.

You open ChatGPT or Midjourney or whatever. You type something in. And the output looks... wrong.

Not terrible. Just... off.

So you try different words. You Google "better prompts." You watch another tutorial. You spend three hours and end up with one image that's barely usable.

Here's what nobody tells you:

Prompting is a skill. It takes months to get good at. And the people in those tutorial videos have been doing it for years.

That's the gap.

Launchdio closes it.

They built something called AI Magic into every kit. You describe what you want in plain English — like "a cute goldfish for a kids' drawing book" — and it translates that into the expert-level prompt behind the scenes.

You never see the prompt. You just see the result.

And the result looks like it came from someone who's been doing this for years.

Because technically, it did.

**EMAIL 4** — The Comparison

**Subject: the manual way vs. the easy way**

Hey —

Let me show you something.

Here's what it looks like to make an AI product the manual way:

1. Figure out the right prompt
2. Generate, hope it works
3. It doesn't. Guess what to change.
4. Try again. Closer, but not right.
5. Download the image
6. Open Canva or Photoshop
7. Upload, adjust, tweak
8. Download again
9. Open a new chat for the next step
10. Lose your context, start over
11. Track credits across 3 different platforms
12. Try to remember all this next time

Time: 30–60 minutes. If you know what you're doing.

Here's what it looks like with Launchdio:

1. Open the kit
2. Describe what you want
3. Get it
4. Export

Time: Minutes. Sometimes seconds.

Same result. One takes an afternoon. One takes a coffee break.

That's it. That's the whole pitch.

**EMAIL 5** — The Numbers — Social Proof

**Subject: some numbers worth seeing**

Hey —

I don't usually send emails with revenue numbers because most of them are BS.

These aren't.

These come from third-party videos — independent creators showing their own dashboards. Not selling anything. Just showing what they're doing.

Here's what caught my eye:

— One creator making \$700–800/day from learn-to-draw books on Amazon KDP. Three books.

— A scavenger hunt book author selling 5,000–9,000 copies per month. Published 30+ books in the niche.

— An Etsy digital download store with 8,800+ sales in under a year. All AI-generated portrait styles.

— A single print-on-demand t-shirt design that did \$79K–99K in one month. One design.

— A YouTube Shorts channel hitting 300 million views in 30 days with AI-generated transformation content.

Now — disclaimer. Those are their results. Not promises. Not guarantees. What you do is up to you.

But the methods are real. And Launchdio makes them doable without the months of learning prompt engineering.

The free training on the page walks through all 10 methods:

**EMAIL 6** — The Kick in the Pants

**Subject: you already know what to do**

Hey —

I'm going to be direct with you.

You've watched the AI side hustle videos. Probably a lot of them.

KDP books. Print-on-demand. Etsy digital downloads. YouTube Shorts. Printables. Digital art packs. You've seen the breakdowns. You've bookmarked the tutorials. You've told yourself you'll "figure it out this weekend."

And you haven't done it yet.

That's not a character flaw. That's a tooling problem.

Every time you sit down to actually try, you hit walls. The prompting doesn't work. The tools are confusing. You spend hours and get something that looks amateur.

So you close the laptop and tell yourself you'll try again later.

Launchdio exists specifically for this moment.

You open a kit. You describe what you want. You get it. Done.

No prompting. No design skills. No "learning curve."

The 14-day guarantee means you can try it with zero risk. If it's not for you, get your money back.

But I think you already know what to do.

**EMAIL 7** — The Value Stack

**Subject: what you actually get inside this thing**

Hey —

I want to break down what you actually get with Launchdio because I don't think most people realize how much is in here.

The Core plan:

- 10 done-for-you kits. Each one matches a real money-making method. KDP books, book covers, brand identity kits, POD designs, YouTube content, lead gen content, digital downloads, AI portrait styles, and more.

- 1,500 AI credits to generate with.

- AI Magic built into every kit. You describe in plain English, it handles the expert prompting.

- Commercial license. You can sell what you make.

- Launch bonuses.

- 14-day money-back guarantee.

If you want to go all in, the Pro Bundle adds:

- 50 kits total (everything in Core plus 40 more)

- 10,500 credits

- 4K resolution output

- POD module, agency engine, book builder, shorts maker

- 15 pro extension kits (AI upscaler, background remover, video editor, lead magnets, and more)

Both plans have the 14-day guarantee. Both are still on launch pricing.

Go see what's inside:

**EMAIL 8** — The Digital Products Angle

**Subject: the digital product goldmine nobody's talking about**

Hey —

Here's something I've been thinking about.

Everyone talks about print-on-demand. And yeah, POD works. But you know what has zero shipping, zero inventory, zero fulfillment headaches, and near-100% margins?

Digital products.

I'm talking about:

- Printable planners, journals, and coloring books people download and print at home
- Digital art packs — wallpapers, phone backgrounds, themed collections
- AI portrait styles on Etsy (one store did 8,800+ sales in under a year)
- KDP books — learn-to-draw, scavenger hunts, activity books
- Digital download bundles on Gumroad or Etsy
- PDF lead magnets and workbooks

You create it once. You list it. It sells while you sleep. No printing. No shipping. No customer service nightmares.

The problem has always been making the actual thing. That's where people get stuck.

Launchdio handles that part. You describe what you want. You get it. Export. List it. Done.

One afternoon with Launchdio could give you a digital product shop with 10+ listings ready to sell.

**EMAIL 9** — The Urgency Email

**Subject: this won't be available at this price much longer**

Hey —

Short one.

Launchdio's launch pricing is ending soon.

After that, the price goes up on both plans. And the launch bonuses disappear.

That's not fake scarcity. That's just how launches work. They price it low to get early users. Then it goes up.

Both plans have a 14-day money-back guarantee so there's literally no risk.

If you've been thinking about it, this is the "do it now or pay more later" email.

**EMAIL 10** — The Last Call

**Subject: last thing I'll say about this**

Hey —

This is the last email I'm sending about Launchdio.

Here's the summary:

It's a tool that builds the thing you want to sell. You describe it, you get it. KDP books. POD products. Digital downloads. Printables. Brand kits. Book covers. YouTube content. AI art packs.

No prompting. No design skills. No figuring anything out.

14-day guarantee. Launch pricing. Won't last.

There's a free 20-minute training on the page that shows 10 methods people are using right now to make money with AI content. Worth watching even if you don't buy.

That's it. I'm not going to keep selling you.

You're either in, or you're going to keep watching videos about what other people are doing.

Your call.

P.S. — The guarantee means you can try it risk-free for 14 days. The only way to lose here is to not try.
