

Hello,

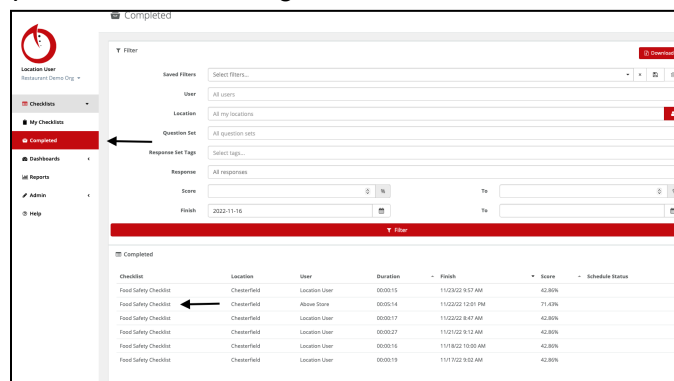

This location utilizes the OpsAnalitica Operations Management Platform for their daily operations and food safety record keeping.

Benefits of the OpsAnalitica Platform include:

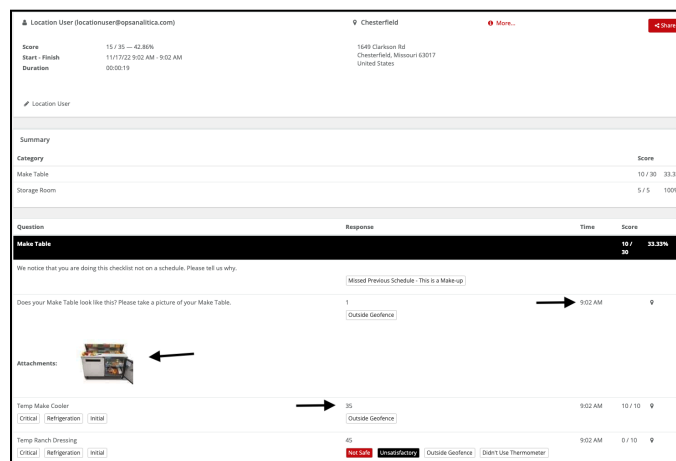

- Time date stamping of responses.
- Geofencing and geocoding of responses.
- Real-time corrective actions.
- Data Integrity: responses cannot be edited upon being submitted.

You can rest assured that the data you will see in the OpsAnalitica Platform is more accurate than what you would see on a paper form.

If you would like to see a completed checklist or log, have the team member on duty follow these simple steps:

1. Click on Completed
2. Select the Checklist you would like to view, click on that row.

3. This view is the paper version of your digital checklist.
4. You will be able to look at the questions and answers just like you would on a paper form.

The OpsAnalitica Platform is one of the best platforms in the world for managing food safety compliance. We hope this gives you a high level overview of the platform. If you would like to learn more about OpsAnalitica, visit us at OpsAnalitica.com.
