&. IMPORTANT NOTES ...

- my interpretation of elsa is primarily based on *frozen i* and the Broadway show. i borrow some elements from *frozen ii*, *once upon a time*, and *kingdom hearts*.
- i will also draw inspiration for my portrayal from the original fairy tale, *the snow queen* by Hans Christian Andersen, as well as from the real-life mathematician and philosopher, Émilie du Châtelet.
- the *Descendants* franchise will largely be excluded from this blog.
- icons used in this doc are from [here](#).
- **please note:** these verses are subject to change the more i write with them and build on them.

&. OTHER VERSES ...

VERSE 005. other.

- anything and everything that doesn't fall under the verses listed.

VERSE: modern.

- **age:** thread dependent.
- set in modern times. the default for this verse is a college setting, where elsa is studying political science with a minor in math.
- elsa was born to scandinavian royalty. at an early age, it was revealed that she had magic powers over ice and snow closely linked to her emotions, forcing her to adopt a *conceal, don't feel* tactic to blend in.
- to attend college and attempt to live a normal life, elsa hides her identity as the daughter of royalty and wielder of magic.

VERSE: once upon a time.

- **age:** 22.
- set during elsa's appearance during season 4 of abc's *once upon a time*.
- very canon-divergent and headcanon-based.

VERSE: kingdom hearts.

- **age:** 21.

- set during elsa's appearance in *kingdom hearts iii*.
- very canon-divergent from the storyline in the game. elsa plays a much more active role with sora, donald, goofy, and organization xiii, though she is not yet aware she is one of the new princess of heart.

VERSE: **pokemon.**

- **age:** thread dependent.
- **region:** galar.

- alternate universe where elsa is a pokemon gym leader specializing in ice-types.

VERSE: **ralph breaks the internet.**

VERSE: **genshin.**

- **element:** cryo.
- **weapon:** catalyst.
- **nation:** mondstadt (*dragonspine*).
- alternate universe taking place in **teyvat**. the heir to one of the founding clans of present-day mondstadt, elsa got her vision when she was a child. however, she never quite grasped control of her vision. it was highly in tune with her emotions and it often felt like her vision controlled her rather than the other way around. after nearly hurting her sister in wake of their parents' untimely deaths, elsa fled to isolate herself in dragonspine.

VERSE: **my hero.**

- **age:** early twenties.
- **quirk:** cryokinesis. can control ice and snow. however, elsa never really gained control over her quirk, despite her best abilities.
- this verse is more or less the same as the events of the first film, *frozen*, but taking place in the world of *my hero academia*.
- you would think that in a society where everyone has a quirk, elsa would be in an environment where she felt normal. but this was not the case, unfortunately. elsa demonstrated her ability to control ice at a very young age. as she got older, her ability to control it slipped further and further away from her. she was warned that her quirk could be very dangerous to the people around her. so, as a way to protect her family, elsa swore to never use her quirk again. she had no desire to use her quirk, let alone be a hero she sees on tv. not even her younger sister knows the true nature of elsa's quirk. however, as we all know, her quirk is deeply connected to her turbulent emotions.
- elsa is the heiress to a very wealthy trading company. despite her family being very well known, she avoids the public eye as much as possible. she received the best private education, one that *did* include quirk training that didn't work for her. it isn't until elsa inherits the family business at age 21 that she loses control entirely.

- *can take place before, during, or after the events of the series.*
