Subject Metadata Dictionary – Characterizing the Interview Stories

Subject filtering is used to characterize the story type to narrow the repository search to only those interviews that meet the story filter. Generally, there are two story filter levels: Primary and Secondary where the secondary filter further narrows the primary filter's value. Occasionally a tertiary filter can be added.

BUILDINGS

Stories about working in the building, building the building

- Art Museum
- Biodesign
- Computer Commons
- Farmer Building
- Fletcher Library
