

WHO is Exchanging the Truth for Lies?

Do we have enough evidence for global scientific fraud over time?

Thinking:

Philippians 4:8 Finally, brothers, whatever is true, whatever is honorable, whatever is right, whatever is pure, whatever is lovely, whatever is admirable--if anything is excellent or praiseworthy--think on these things.

A whole line of questions with rabbit holes began in my head while watching this:

 Susan Lindquist (Whitehead Institute, ...

(Just a thought while watching this video)
“Let them grow together until I cut them off”

Wheat and Tares-just thinking

The spotted animals vs non-spotted
animals-in Genesis

 Susan Lindquist (Whitehead, MIT / HH...

What are we assuming in evolutionary
biology?

What is missing in evolutionary biology?

Has anyone spotted the lies related to the creation of the following:

Marxism ?

Palestine ?

Cancer ?

COVID ?

The Rockefeller Institute ?

What is Truth?

Does all Truth have a bit of non-truth inside?

What is the definition of Truth with a bit of non-Truth combined? A lie?

<https://www.davidmartin.world/attorney-general-document/>

Could we rename a LIE as “Recombinant Truth”?

What is the mechanism by which LIFE is driven?

According to evolutionists?

Does our environment, whether stressful or non-stressful, cause disease?

Can we survive and thrive when surrounded by chaos?

What is Kinetic Energy?

Why do scientist's say, "It is hard for proteins to fold in the first place"?

Because "chaos"? "Stress"? Environment?

What is the difference between "all organisms" and "man" (which is classified as an organism)

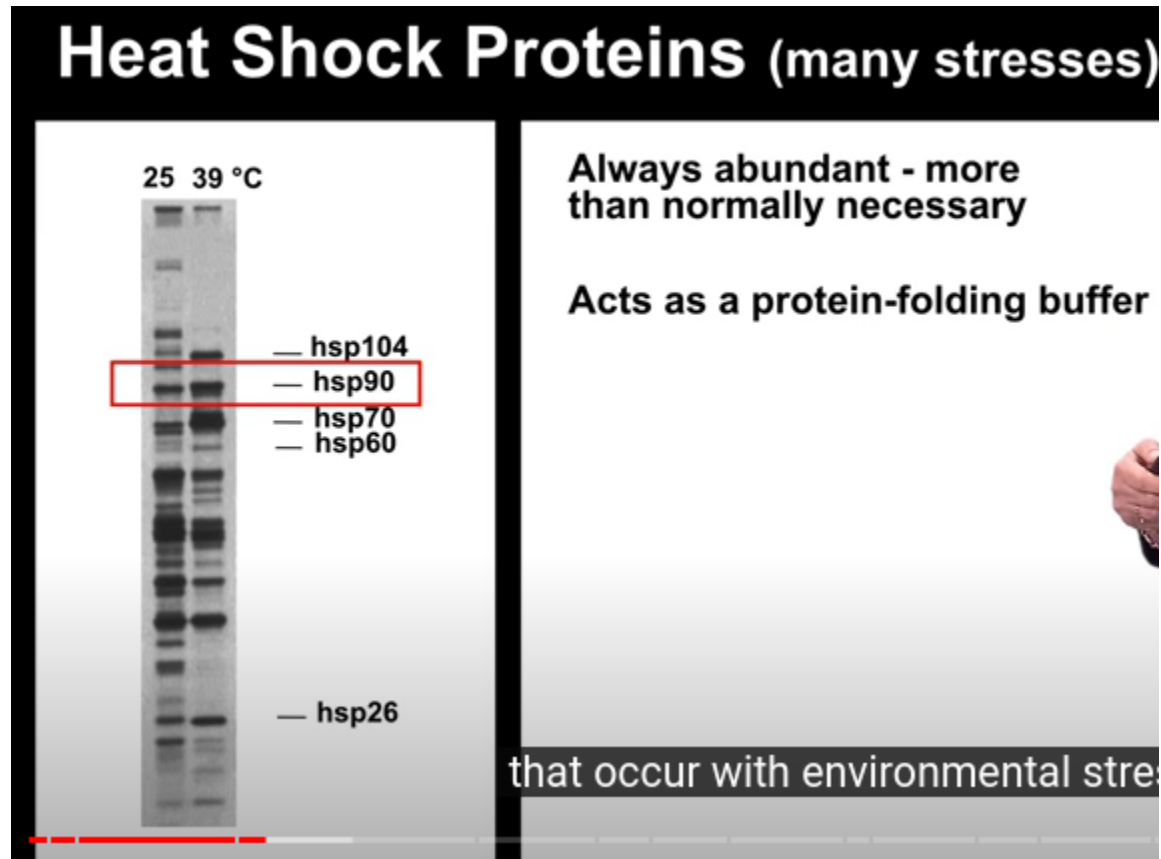

Do all organisms face the problem of "misfolded proteins"? How and Why?

What is HSP90? (group of proteins)

Made in abundance? Who made them?

What are the names of the rest of the Heat Shock Family of Proteins?

Why are the other Heat Shock Family of Proteins not in abundance like hsp90?

What are the names of all of these HSP's and how were they classified?
(Buffers of environmental stress)?
Protein folding aids?

What are “signal transducers”?

What is V-src? First cancer causing protein found? By who?

Can cells be potentiated and buffered all at the same time?

Does change in cell structure and function happen during environmental stress?

What is the evolutionary definition of environmental stress?

What causes environmental stress on cellular level?

Does Kinetic Energy cause environmental stress?

Does the Heat Shock Protein, hsp90, get “taken away” during environmental stress conditions ?

Compare the term, “Buffer” and “Hedge of Protection” related to Creation vs Evolution.

How?
(GAL -promoter)?

What do scientists mean by “Heat Shock Protein Family”?

Going from Yeast to Us- Eukaryotic?

So we are compared to Yeast?

Evolution vs Creation?

Can one believe in Evolution and still believe in Creation at the same time? How?

What is the ambiguity of the term, “more likely” used to describe?

Synthesis -

As in man-made

As in natural processes

How has the term: “synthesis” been misrepresented?

<https://www.jcvi.org/sites/default/files/assets/projects/synthetic-genomics-options-for-governance/Baric-Synthetic-Viral-Genomics.pdf>

Why do scientists use the term: “Wild-Type” to mean something that is natural in nature?

How has the term: “Trans-form” been misrepresented over time?

(rabbit trail)

<https://archive.org/details/TheConflictOfTheAges-TheMysteryOfLawlessness-ItsOriginHistoric/page/n5/mode/1up>

<https://www.ministrysamples.org/excerpts/THE-DEFINITION-OF-TRANSFORMATION.HTML>

What is “src transformation”?

<https://archive.org/details/pubmed-PMC3256973/mode/1up>

this year marks the centenary of the publication in the *JEM* (Rous, 1911) of one of the twentieth century's most seminal discoveries in medical research, namely, the filterable agent that became known as Rous sarcoma virus (RSV). It earned the discoverer, F. Peyton Rous (1879–1970; Fig. 1) the Nobel Prize in 1966. Rous made his discovery at the Rockefeller Institute, as the University was then known, and he stayed there for the rest of his long and illustrious career. Why was the discovery important and why did it take so long for Rous to achieve the ultimate accolade of a Nobel Prize?

Peyton Rous was born on October 5, 1879. His father died when he was still a child, leaving his mother to raise three children on a meager income in Baltimore. As a youngster, Rous was fascinated by natural history. He studied at Johns Hopkins University, gaining his BA in 1900 and his MD in 1905. After brief periods investigating pathology at the University of Michigan and in Dresden, Germany, in 1909
