

How to customize the model:

Note: Best read on PC/computer.

1. Go to the “Expression Editor” under Hotkey Settings & Expressions.

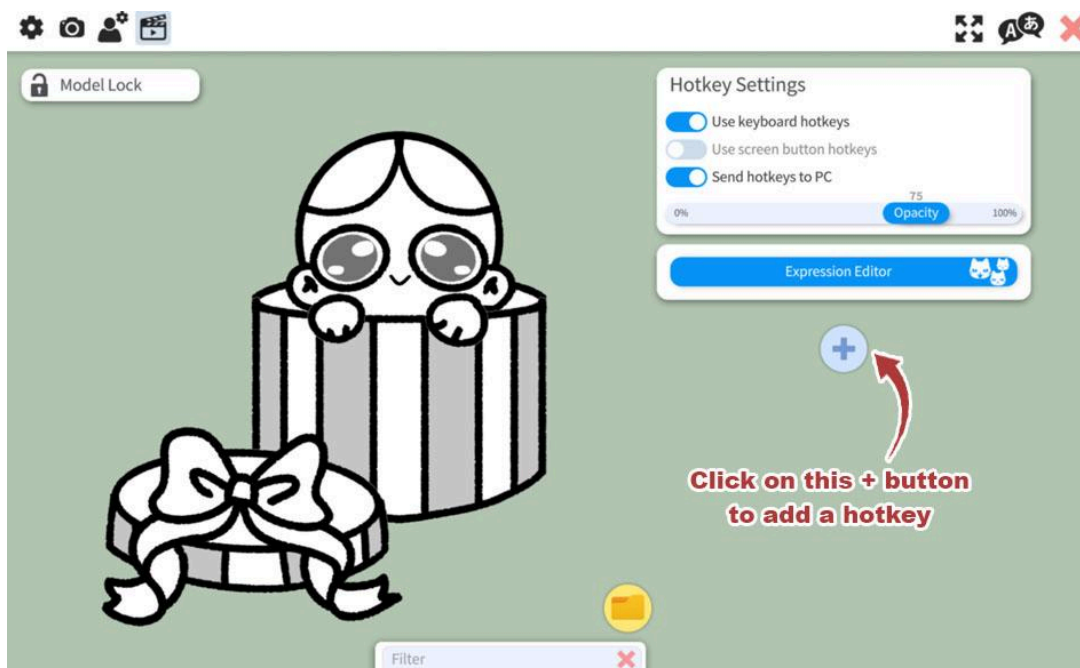

2. Click “Create new Expression”.

3. Customize the parts to your liking! Make sure to turn on the layer. Don't forget to name the expression and save it!

4. Next is to set up a hotkey to activate your expression. Click on the “+” button.

5. Set up the hotkey like this! Make sure to choose the expression you made for "Expression". You can record your preferred Key Combination to activate it.

You **MUST** credit @DianaBellHERE/@DianaAirlinesVT and @safaeie_garden when using the model.

COLOR GUIDES:

1. Each color parameter is named with "Color_" and each coloring option is made from:
 - Base color: Defaulted as -1(usually white)
 - Hue color: Defaulted as -1 (usually white)
 - Hue intensity: Defaulted as -30, 0 percent opacity(This is the parameter that guides the opacity of the Hue color layer)
 - Darker/Lighter: Defaulted as 0, (0 percent opacity)
Moving to the right = Darker
Moving to the left = Lighter

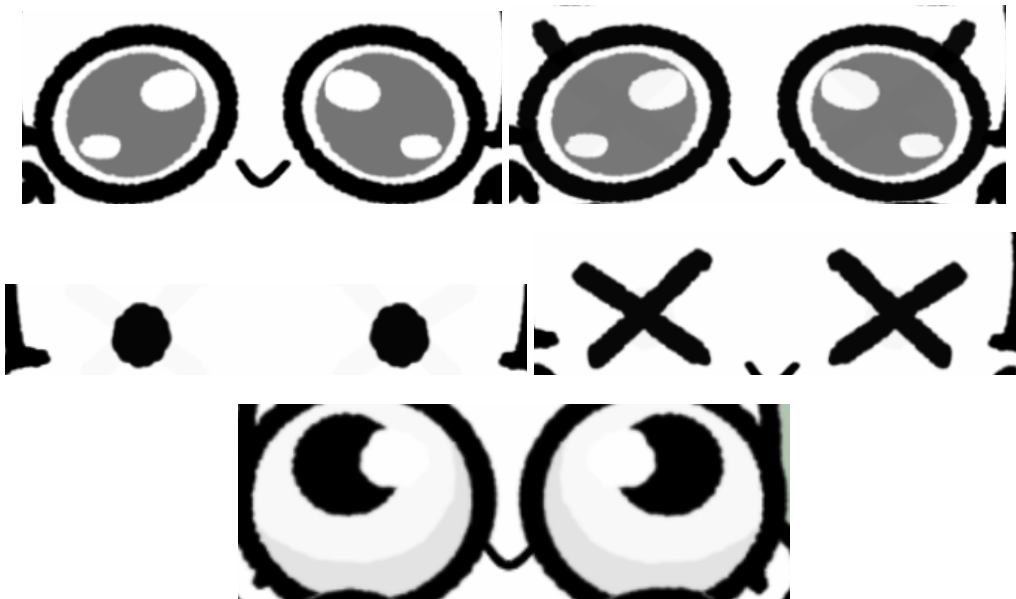

Some colors will be separated into Left and Right or Inner and Outer options.
