

Contractor Price List (as of April 1st, 2024)

The business begins with written goals. The strategy is a collaborative effort to help you reach your business goals. I require written goals that are SMART (specific, measurable, achievable, realistic and timely). SMART goals are beneficial because they provide:

- Clear communication and alignment. When your project team knows exactly what they're working towards, they're more motivated and aligned as a team. Team members who know how their individual work contributes to broader company goals are 2X as motivated as their counterparts. Setting and sharing SMART goals can help you boost your entire team's motivation.
- Clarity towards project success. SMART goals help you set clear goals, so you can avoid vague or confusing goal language.
- Clear roadmap and finish line. With SMART goals, you know exactly what you want to achieve and when you expect to achieve it. You've verified that these goals are realistic and achievable. And you know you'll be able to measure them to see if you hit them or not.

Then:

1) Written Strategy to achieve smart goals	\$500.00
