Join the Google Meet chat room to verify demographics

The process is automated. No screen recording tool is needed, no more sending videos to moderators manually.

Go to [Discord](#), open a ticket in Demographic Verification channel, and it will send you the link to the call after a short form. Go to the call and start sharing the screen.

Once you share the demographics of the video, finish the call. The resulting video will show up in the ticket for mods to verify

To verify the next video, make another ticket in the same chat
