

GUIDE TO SETTING UP RYUJINX NINTENDO SWITCH EMULATOR TO PLAY TSUKIHIME

UPDATE: There is already an official english version for Tsukihime, please buy that instead

Before we start, you should make sure that your computer hardware meets the minimum requirements for Yuzu.

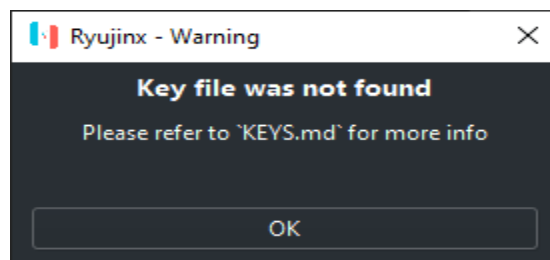

- At least 8GB RAM
- A video card/GPU that supports OpenGL 4.5 or higher
- OS-specific dependencies installed

1. What you need to download first:

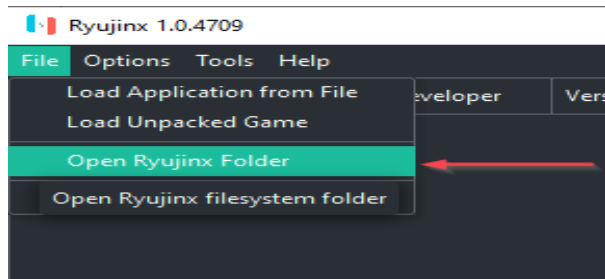

- Ryujinx emulator: Go to the official website and download it: <https://ryujinx.org/download>
- Keys file (for new firmware), please make sure you have the keys file for the newest Switch firmware: <https://prodkeys.net/prod-keys/>
- Switch firmware (newest version): <https://darthsternie.net/switch-firmwares/>
- Tsukihime NSP file: <https://nyaa.si/view/1425243>
- Tsukihime update 1.0.1: [Download Link](#) - [Alternative Link](#)

2. Set up Ryujinx Emulator and playing Tsukihime with it

1. Extract Ryujinx and then open Ryujinx. You will meet this message, but don't worry. Its normal

2. Click file at the top left -> Open Ryujinx folder

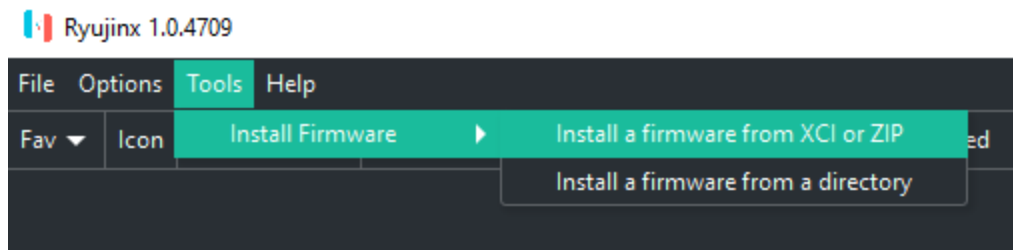

3. Go to the System sub-folder. Extract prod.keys into here

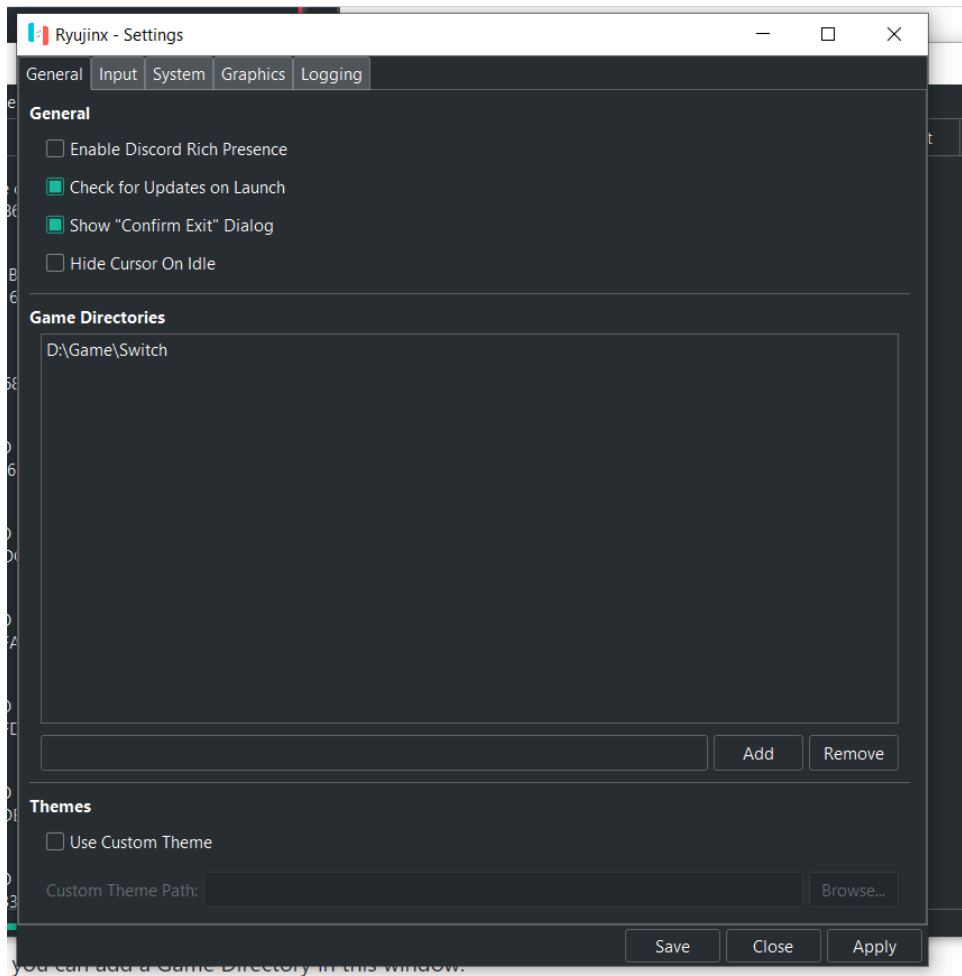

Roaming > Ryujinx > system

Name	Date modified	Type	Size
prod.keys	08/07/2021 2:15 SA	KEYS File	11 KB
Profiles.json	28/08/2021 8:36 CH	JSON File	65 KB

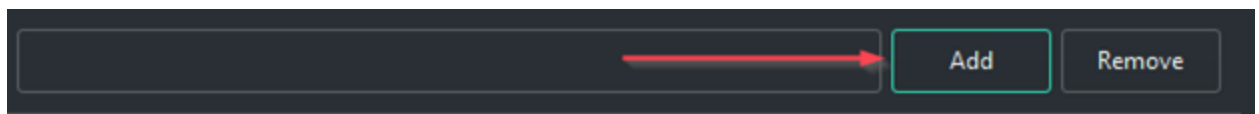

4. Close Ryujinx and reopen it. You shouldn't see the error message again
5. Click on Tools -> Install firmware -> Install firmware from XCI or ZIP

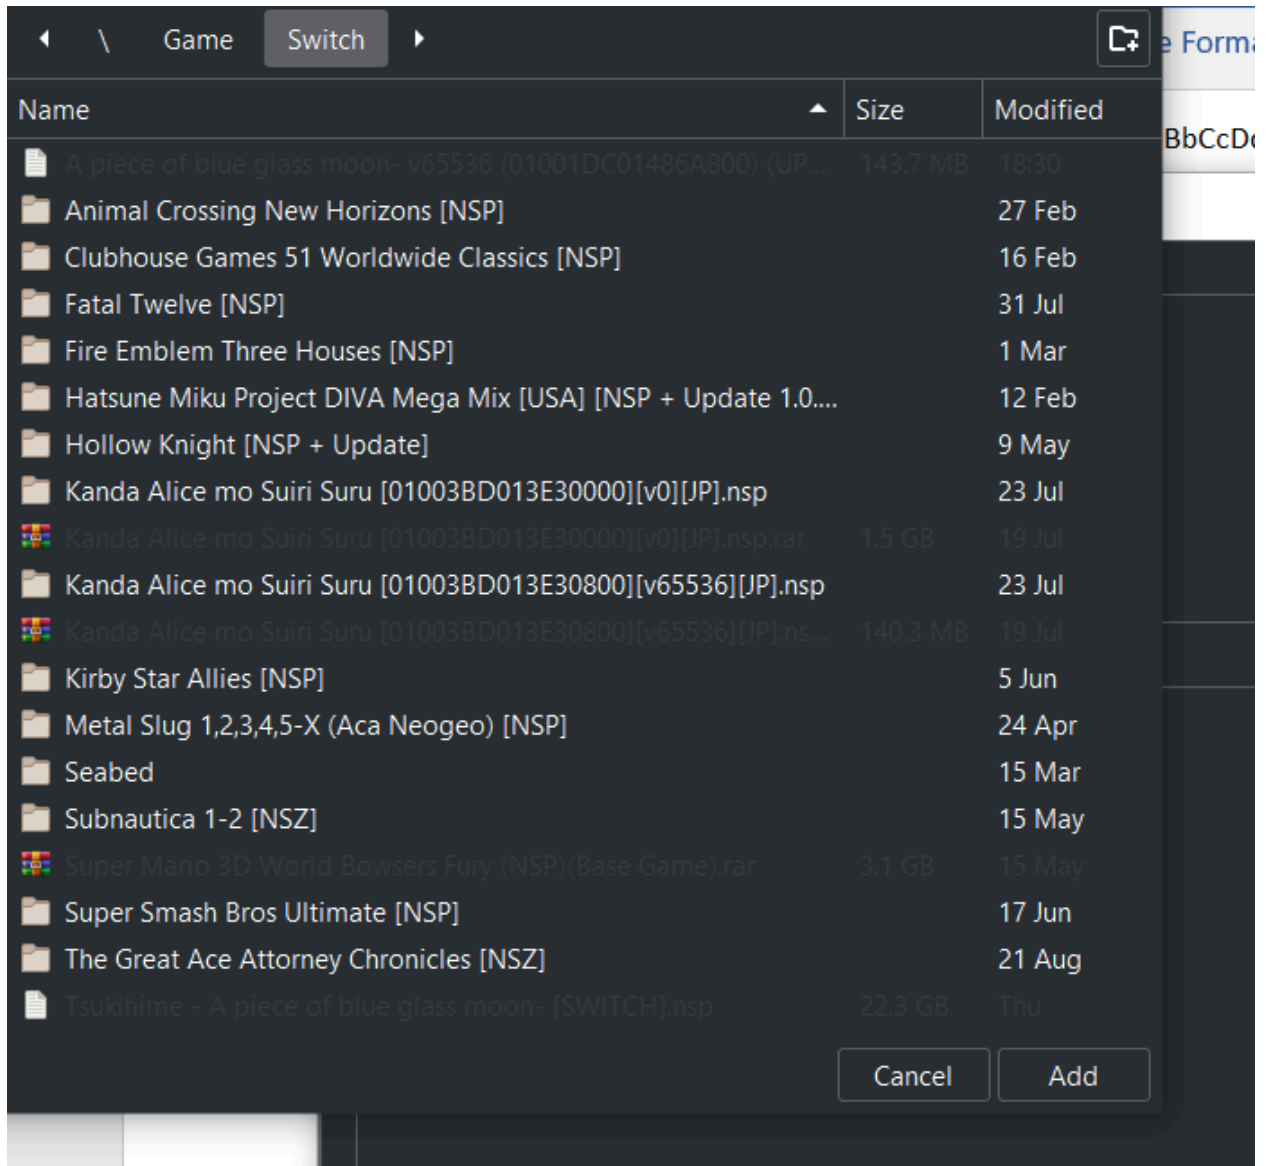

6. Click on the firmware you have downloaded. A box will appear and ask you to install the firmware -> Click Yes
7. Wait a minute for it to finish
8. With Ryujinx open, click Options -> Settings

9. Click the button Add.

10. Navigate to the folder that contains Tsukihime nsp file -> Click Add

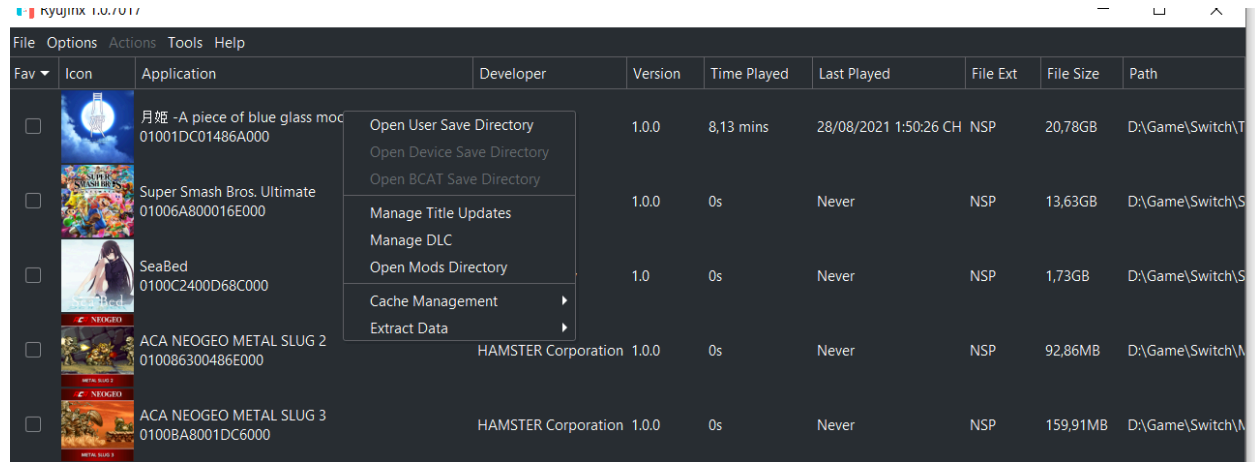

11. Click Save the setting, your games will now show up on Ryujinx
12. Double click at Tsukihime to play the game
13. If you want to stop the game, click Action on the top bar -> Stop emulation

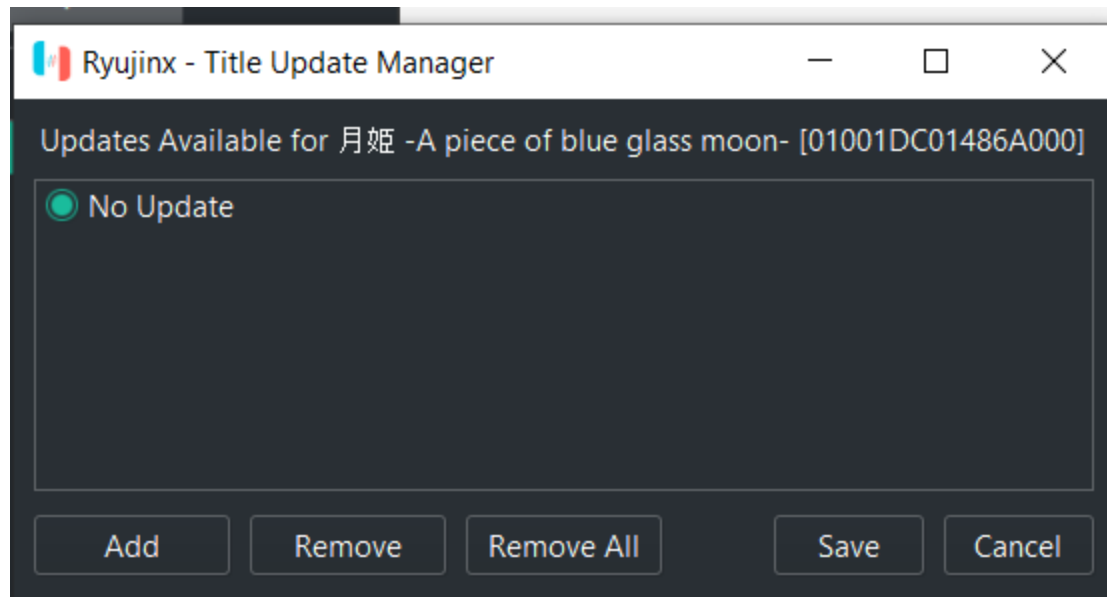

Warning: If you experience low fps, lagging in the opening of the game, don't give up. The opening of the game is very laggy, but after you go through it, it will be more stable. You should wait for the opening to finish

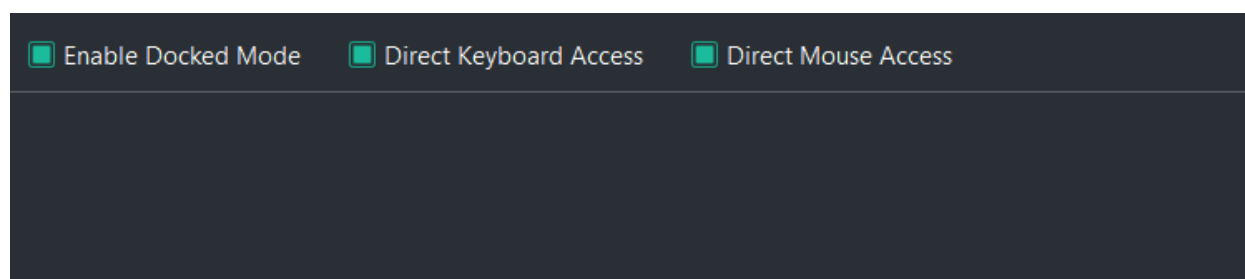

3. How to install update for Tsukihime

1. Right click on the game -> Manage Titles Update

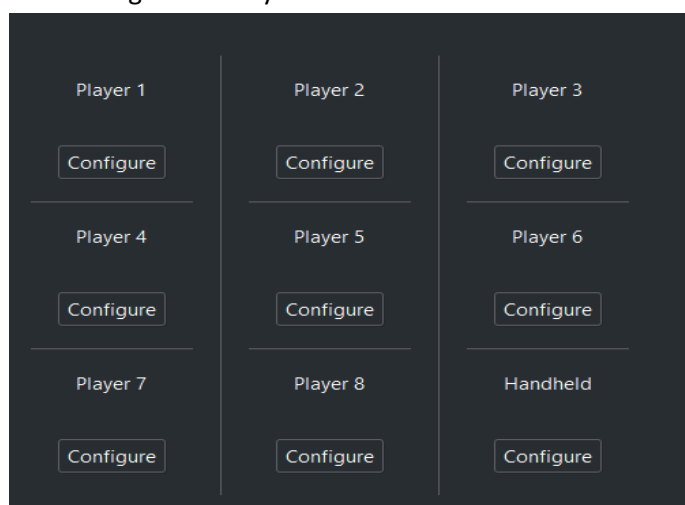

2. Click on add -> navigate to the directory of your tsukihime update 1.0.1 file

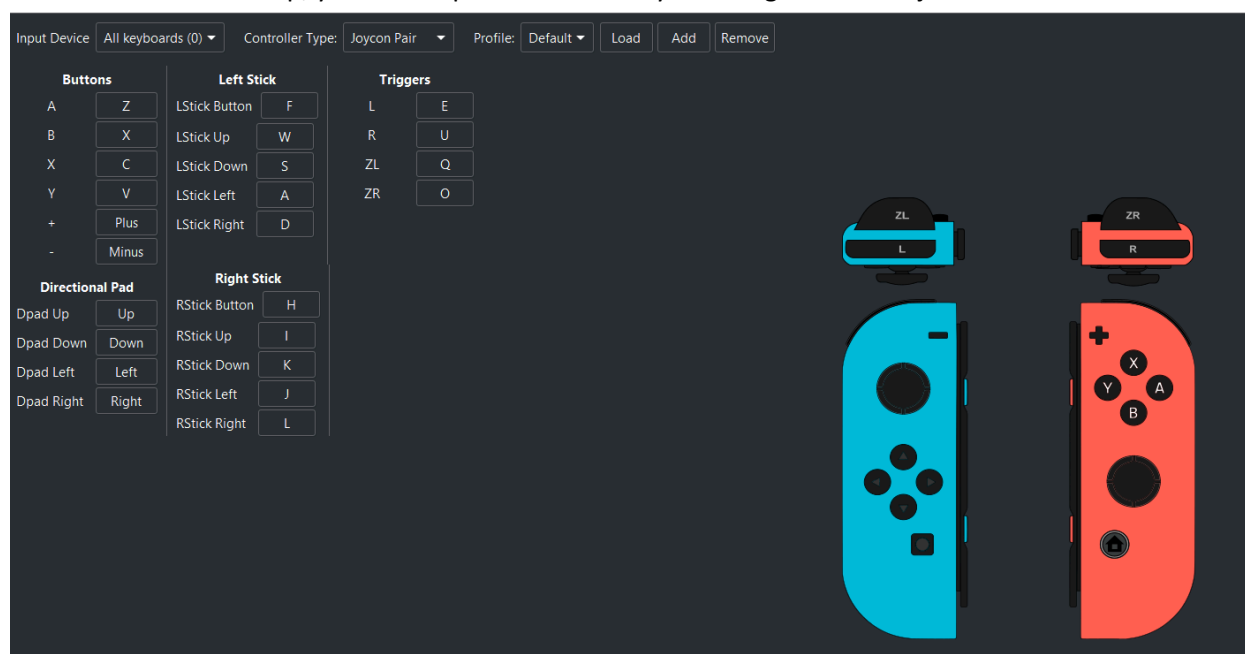

2. Click Configure on Player 1

3. This tab will show up, you can map the controls to your liking in here. Or just use the default one

5. Credit: All credit go to Ryujinx Development team, this guide is only for the purpose of helping people to set up Ryujinx Emulator
