Level 1 - Defining Objectives.

1. **Momentum Trader:** I form a strong opinion based on the big picture and continue to be biased to my opinion as long as the data continues to support accurately. I am comfortable riding the momentum train.
2. **Time Availability: Scalping:** I have the entire NYSE hours to trade. The LEAST availability possible would be the morning session to end of lunch. I have plenty of time to devote to the screen.
3. **Risk Profile: Risk Tolerant:** I can handle risk, I can handle the stress that comes with it. I recently blew up a small account, due to poor risk management and trying to "Get Rich Quick." I am Re-building my capital to start a new account currently, I can handle the fluctuations, but I no longer will risk it all.
Stats: Age - 19. **Free Cashflow** - Low capital, rebuilding. **Stress Tolerance** - High.
4. **Asset Class: Options:** I have already been trading options; I understand them better than all the others and I enjoy trading them. The leverage is appealing.
