Play with all of the settings to see what this does	1
Close the picture to send it back to Lightroom	1

### Find a photo with a close up a person's face in LR :

#### 1. Command-E to send photo to PS

- The photo will open in PS
- Change background to "Original"
- Duplicate the Original layer (cmd-J)
- Relabel it "Face liquify"
- Hide Original layer

#### 2. Click on the person layer

- Choose Filter>Liquify

#### 3. Play with all of the settings for Face aware liquify

- Click OK when you are done
- Compare the two layers by turn on and off the visibility of the layers

#### 4. Duplicate the original layer

- Click on the original layer
- Duplicate the Original layer by typing cmd-J
- Relabel the new layer as "Manual liquify"
- Drag the Manual Liquify Layer up above the Face Liquify layer

## 5. Choose Filter>Liquify

- a. Open brush tool options

## 6. If it's not already selected, select the Forward Warp tool (W).

- i. You can use this to push groups of pixels around
- ii. You can adjust the brush using the brush settings
- iii. Or you can adjust the brush size with the left and right square brackets

## 7. Select The reconstruction tool (R)

- a. Paint on the area that you changed and it will go back to the way it was.

## 8. Play with each tool on the left to see what it does.

## 9. Close the picture to send it back to Lightroom
