

Mock Equestrian Wars looking for Programmers

This is Earth_Pony with Mock Equestrian Wars!

Our team has done a wonderful job bringing this game from a vague idea to a fleshed-out concept, and now we need your help to take it further!

We're looking for game programmers, web designers, and people experienced with databases and servers. Have some details:

Game programmer: Requires knowledge of any language and a willingness to learn (Javascript). Bonus for GUI or game programming experience. Purpose: help write the game client.

Web designer: Needs to have experience and examples of work with the following: PHP, HTML, CSS. Purpose: Design a visually appealing website for the project.

Database: Experience with Model View Control is required, along with some experience in working with a database and programming for a server (php, asp, perl, python, etc). Bonus points for experience in Multiplayer servers! Purpose: Help design game server code

If you think that you may be interested in helping in any capacity, for any length of time, please send an email to contact@equestrianwars.com and we will get back to you immediately!

Thank you all and I can't wait to hear from you,

Earth_Pony
