

How To Get Instagram Followers Fast

How to view private Instagram accounts

Instagram is another of the many social networking sites operating out on the web today. It is a platform where you can share your photos privately or publicly. Now, if you want to reach out to a wider audience, you have to start collecting your Instagram followers.

Here are a few legit and tried and tested techniques to get Instagram followers fast.

Public accounts -

If you have a private account, it's only your friends who can see what you share. Hence, the first step to getting Instagram followers fast is to go public. For those of you really worried about privacy, you can always keep a check on what you choose to share.

Hashtags -

Instagram uses hashtags to filter photographs. When you search for photographs, the social media network will display all the photographs with a common hashtag.

Popularity is not the only criteria when selecting the hashtags to go with your photographs. You should also use relevant ones. 3 is an ideal number of hashtags to use with your photograph.

Regular uploads -

A dormant account doesn't usually get too many followers. Instagrammers on a regular basis tend to unfollow inactive accounts. Hence, the strategy is to refresh your account with new, original and captivating content.

As a rule of the thumb, don't post too little and don't flood your page. A photo daily is a good standard.

Use filters -

Why you should use filters? Well, they really improve the look of your photos adding a more personalized touch. This sense of added beauty is enough to draw more followers who love following quality work. Check how a particular filter looks before you actually apply it.

Picture collages -

Instead of uploading a lone picture, you can combine multiple images into a single one. Such images are more engaging as they tell a story. There are several paid and free, third party collage makers and photo-editing apps you can use for the purpose.

Time it right -

The most breathtaking photographs will have no viewers if you post it when the entire Instagram community is asleep. The peak times on Instagram are in the morning before work and in the evening after work. This is when most Instagrammers check their accounts. So, time your uploads right.

Follow, like and comment -

Yet another tip to increase your visibility on Instagram is to follow others. They might follow you in return. Take it a step further by liking and commenting on other's photos and videos. You're likely to grab the attention of the photo owner as well

his/her followers. It might prompt them to check out your Instagram account, increasing the likelihood of followers.

Sync with Facebook -

With Facebook taking over Instagram, you can now share your photographs across both the platforms by integrating your Facebook and Instagram account. This way your Instagram activity gets streamed on to Facebook. Facebook Friends that also have an Instagram account will start following you, if they like what you upload.

Call to Action -

Your captions should have a strong Call To action. You should aim for better engagement with your captions. In that, they should compel them to comment or start an interesting discussion.

So, these are different ways in which you can get Instagram followers fast. You can also join micro-blogging groups and participate in discussions there.
