

Cutting – Please see picture for appropriate grasp pattern. This activity requires Supervision. Developmentally they can progress in the following order as a general rule – Straight line, circle, square, triangle, figures. For younger children, they can cut up straws and thread onto a string. You may sequence the items by placing a cut up straw and then thread a cheerio/fruit loop on it and repeat. Sequencing is good for attention and color identification if using cereal products. They can roll play doh and cut into into pieces.
