

Plan to make myself the most successful, powerful, and wise man

The end goal in the next 6 months is to make 500\$-1000\$ online. And start going through the E-commerce section for even more gains.

21. Having money, having some time to make some store and start making sales in the E-commerce campus for the big money. Just learning about this business model and trying 2-3 products at the end of the six months, while continuing with the copywriting hustling.

I need to help a client get more profit. 10K profit

How to help him:

20. Making some nice money from copywriting

19. Get even more and bigger clients

18. Proving the testimonials

17. Leveraging the testimonials

-Showing my clients the testimonials from previous clients

16. Making a testimonial

15. Gaining my first client

14. The first client will be worth 100\$ and I will need to master these things and do that for him:

13. Mastering persuasion and writing it in Google Docs.

12. After gaining experience and insights I will level up as a copywriter and provide even better results for clients. That way the clients will be even bigger and make me more money.

11. Having new insights about copywriting every day

10. Not relying on the win and repeating this process again

9. Getting paid and sharing my wins on the campus

8. Closing my first client

-After closing my first client I need to provide him with the best results and even overdeliver, so he can be grateful and we can maybe work together in the future for a bigger product.

7. Learning how to be specific in the DMs and provide results for the clients.

6. Outreach mastery, how to write a DM (BM and SM campuses)

-Some videos on how to make my outreach technique the best in the world and make people reply to me fast and with curiosity.

5. Picking a great client

-Client that is making money, has engagement and needs help to solve a desired problem.

4. Reviewing and analyzing the work that I have done to achieve greater results

After doing the work I will review a little bit my work, because I can see mistakes.

But most of the time I will send it in the reviewing copy chat to see the mistakes that can be unknown to me.

3. Practising my skill every day to become great at it

2.1. The G work session will be a sum of:

-Analyzing the Top players in the niche to understand what works in this specific niche.

-After re-watching the campus and absorbing more information than before, I will do my G work session to use all of the things I learned right now.

-Analysing the market target, so I can step into the shoes of the avatar, and know what their desire is, their dream state, and the painful reality that is keeping them from success.

-Then I will see what is the purpose of the writing(making a sale, informing the reader, impacting them to click and get some lead magnet or see a product, etc.)

-Reviewing Amazon, YouTube, and other platforms for keywords to use in my copy to grab people's attention.

-Understanding what type of copy I will be writing(long, short, landing page, etc.)

-Connecting the product with the solution that they want

3. Picking a great and profitable niche

-Analyzing the niches that have the potential for good clients and making money

-When I do not have ideas I can ask chat GPT for some help(Example:" Hey

ChatPGT, write me a list of 30 sub-niches in the Cybersecurity niche")

2. Doing the daily checklist every day

-Train every day so I get smarter(more blood in my body and brain)

-Be hydrated with 4 L of water a day(to stop getting brain fog)

-Analyzing top players, so I can gather insights on how to help my clients make more money

-Making one G work session a day and 3 outreach messages(To find out how I can contact people and make them hire me)

-15 seconds of gratitude and focusing on what my future self can look like if I am disciplined

-Power up call of the day to motivate me to work even harder through the day

1. Learning the skill of copywriting even better by reviewing all the valuable sources in TRW, while practicing it.

-Reviewing the boot camp, level 1 or level 4 for a better understanding of the lesson material using Andrew's method to learn new things.

-Going through at least 3 videos to learn new things(every time you watch a video you can notice something that you did not notice the day before). + Reviewing my notes
