

Dry Erase Marker Experiment!

What do drawings using a dry erase marker do when you pour water on them?

Make observations to figure out what factors made the experiment work best.

Use these questions to guide you:

1. Is there a color of ink that worked best?
2. Which drawing surface worked best?
3. Do solid shapes work better than stick figures or letters?
4. Can you pick up your shapes?
5. Can you move your shapes?

[Watch this to learn the science behind what you experimented on!](#)
