

Boeing 737NG Aircraft Configuration Files by FlyPrecisely

Installation Manual

These aircraft configurations are based on Boeing 737NG line numbers and aircraft types.

Naming convention

All the configurations made by *FlyPrecisely* have the strict consistent format of naming for the ease of use.

Any specific aircraft or airframe is named as stated below:

- ICAO AIRLINE_TYPE_REG_LN
AUI_B738_UR-PSX_9999
AUI - Ukraine International ICAO airline code
B738 - ICAO aircraft type
UR-PSX - aircraft registration
9999 - line number (L/N) in four digits, starting from 0001
- TYPE_MSN_LN
B738_99999_9999
B738 - ICAO aircraft type
99999 - manufacturer serial number (MSN)
9999 - line number (L/N) in four digits, starting from 0001
- ICAO AIRLINE_TYPE_RANGE (LNxxxx-xxxx) or (FNxxxx-xxxx)
DAL_B738_LN9999-9999
DAL - Delta Air Lines ICAO airline code
B738 - ICAO aircraft type
LN9999-9999 - line number (L/N) range including the specified first and last L/N in four digits, starting from 0001
FN9999-9999 - fleet number (F/N) range including the specified first and last L/N in four digits, starting from 0001
- ICAO AIRLINE_TYPE (all aircrafts)
DAL_B738
DAL - Delta Air Lines ICAO airline code
B738 - ICAO aircraft type

PMDG B737NG MSFS

This section describes the newest *PMDG Boeing 737NG* model for Microsoft Flight Simulator.

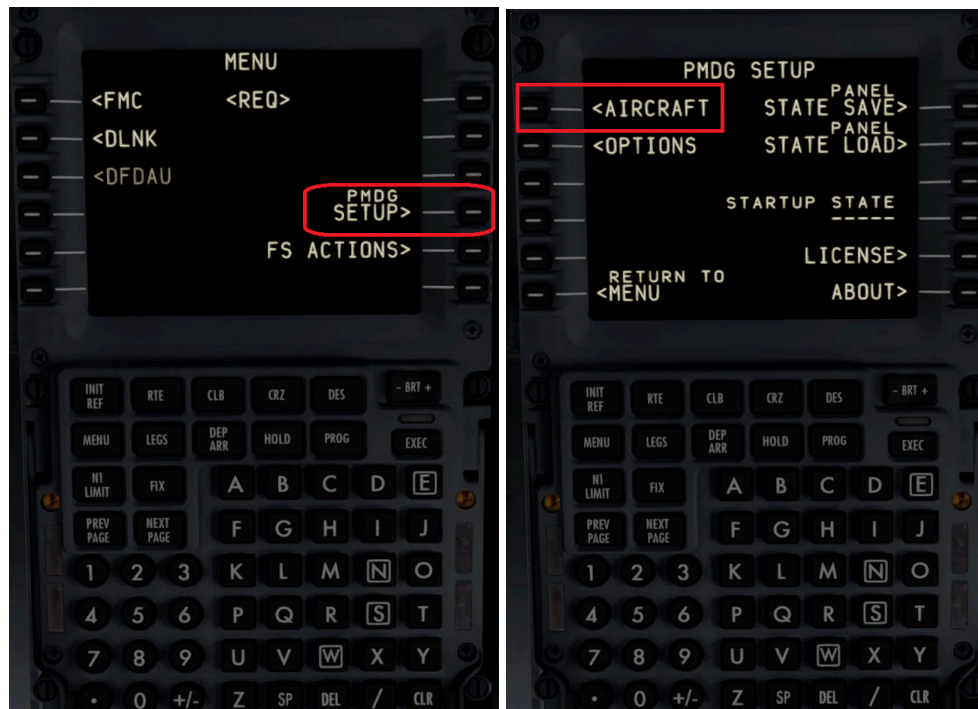

1. Add your new MSFS 737NG livery by copy-paste or PMDG Utility
2. Add the configs to %Windows User%\AppData\Roaming\Microsoft Flight Simulator*
3. When you are ready to fly on any specific airframe and registration, please check its line number (LN) or fleet number (FN) on any online database, e. g. [Planespotters.net](https://www.planespotters.net/) (<https://www.planespotters.net/>)
4. Enter aircraft registration and open its page. Check the "Line Number" field

** **Note.** The actual MSFS folder name may vary, but generally it is named like this*

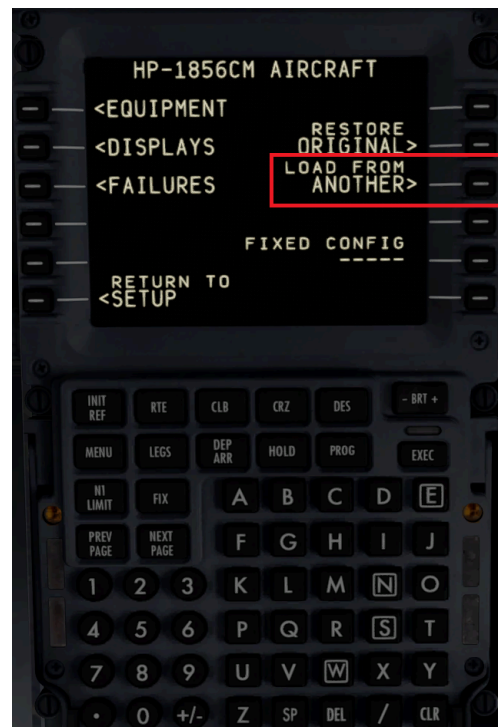

EI-ENM RYANAIR BOEING 737-8AS(WL)

Manufacturer Serial Number (MSN)	35038
Line Number	3528
Aircraft Type	Boeing 737-8AS(WL)

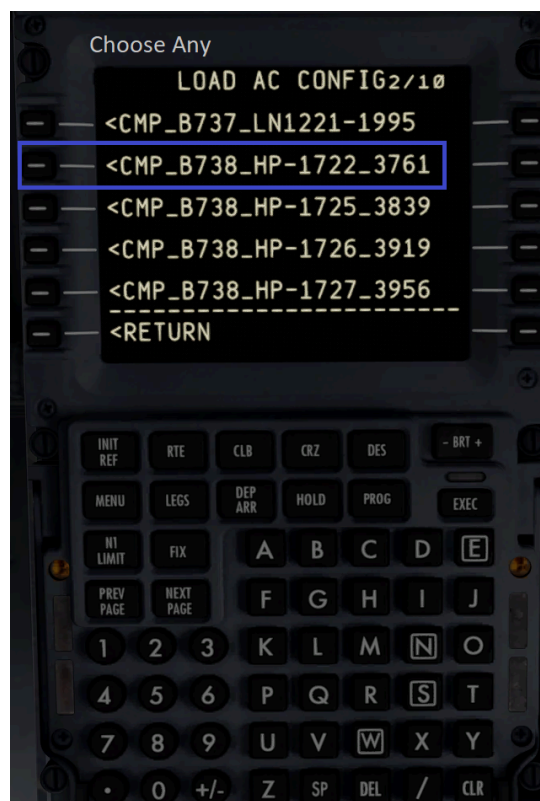

5. When in your flight simulator, open the "PMDG SETUP" page in your CDU. Then open the "Aircraft" page

6. Select "Load From Another"

7. Select the required config according to your airline, registration, type and line/fleet number from the list.

PMDG B737NGXu

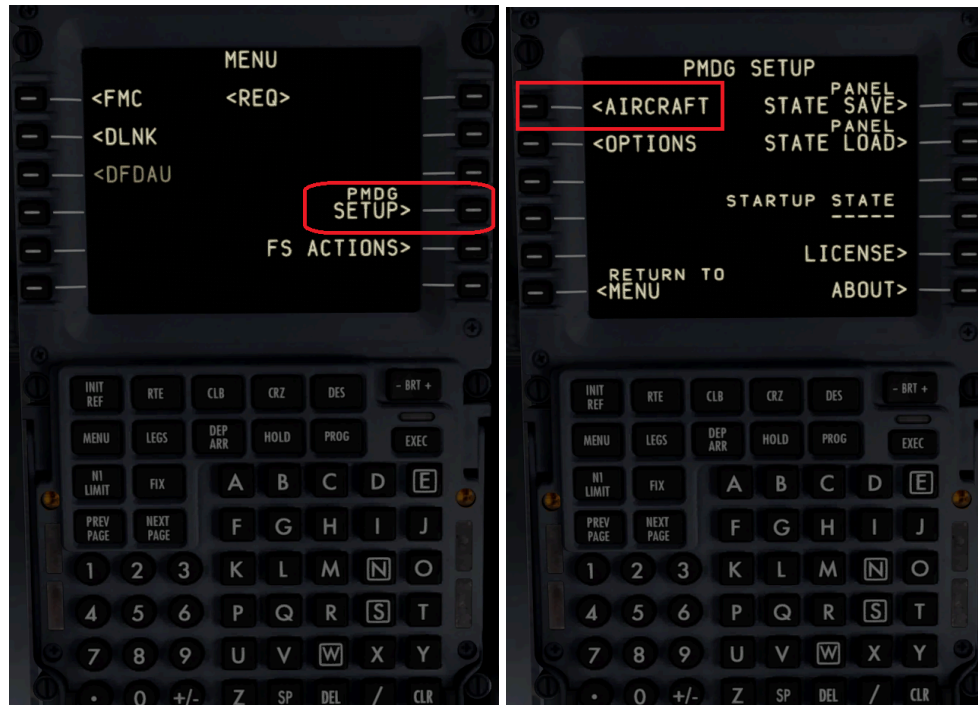

This section describes the newest *PMDG Boeing 737NGXu* model.

1. Add your new 737NGXu livery by copy-paste or PMDG Utility
2. Add the configs to %FlightSim Folder%\PMDG\PMDG 737 NGXu\Aircraft
3. When you are ready to fly on any specific airframe and registration, please check its line number (LN) or fleet number (FN) on any online database, e. g. [Planespotters.net](https://www.planespotters.net/) (<https://www.planespotters.net/>)
4. Enter aircraft registration and open its page. Check the "Line Number" field

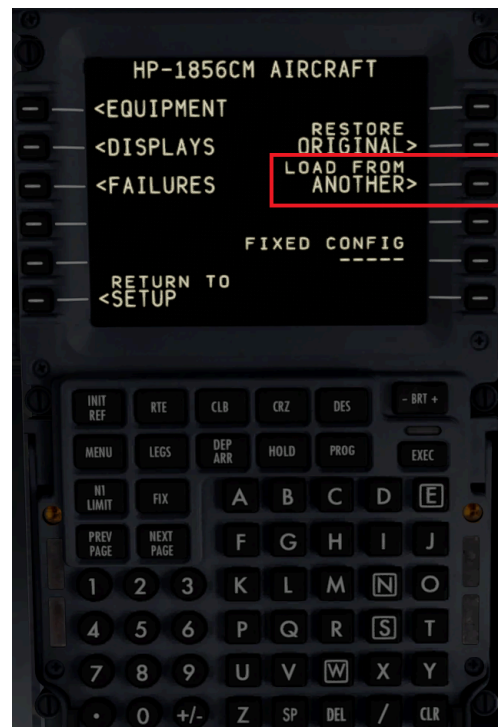

EI-ENM RYANAIR BOEING 737-8AS(WL)

Manufacturer Serial Number (MSN)	35038
Line Number	3528
Aircraft Type	Boeing 737-8AS(WL)

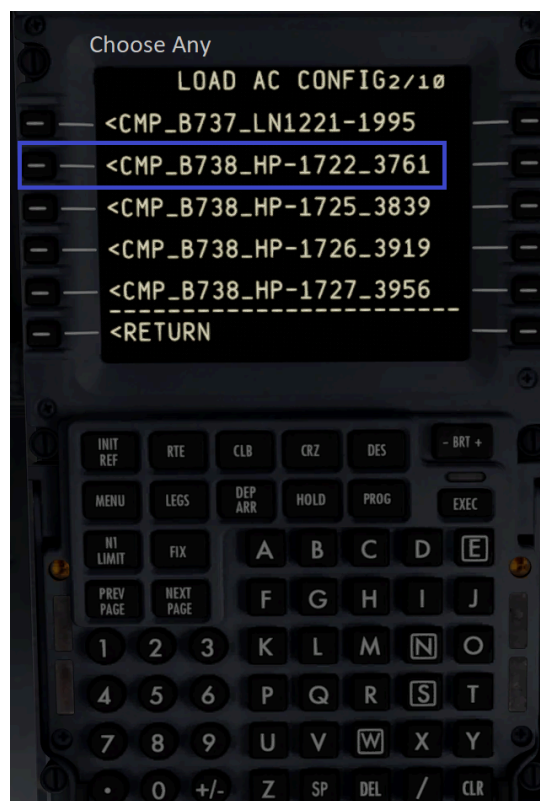

5. When in your flight simulator, open the "PMDG SETUP" page in your CDU. Then open the "Aircraft" page

6. Select "Load From Another"

7. Select the required config according to your airline, registration, type and line/fleet number from the list.

PMDG B737NGX (old)

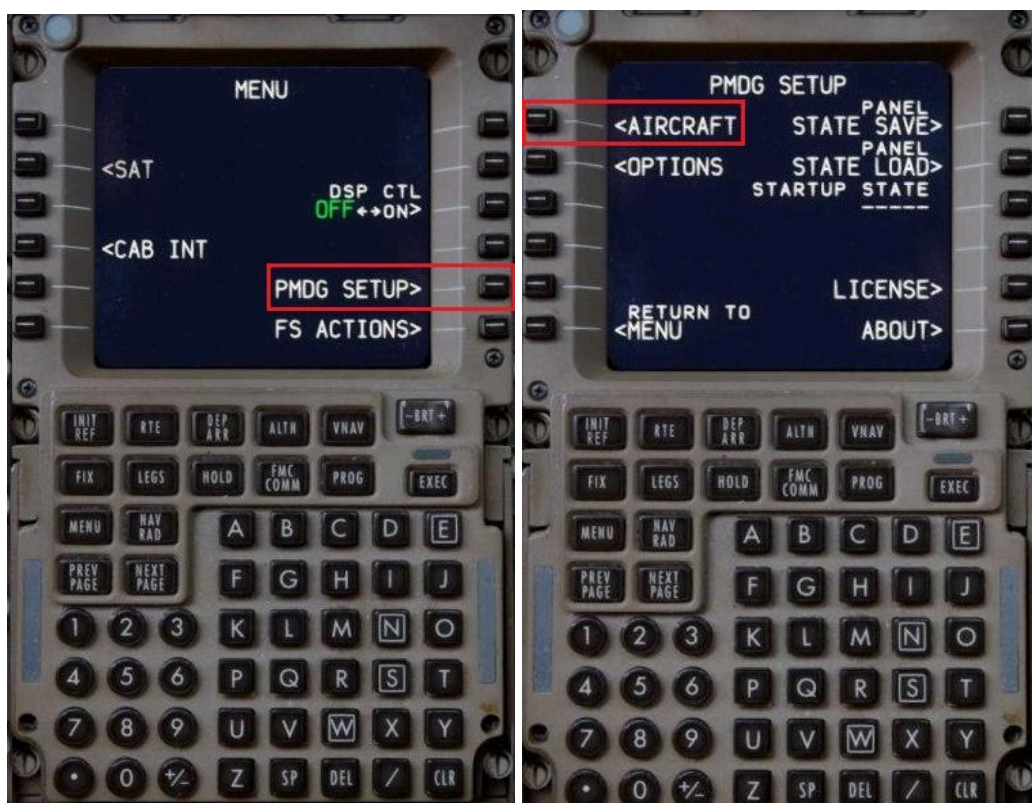

This section describes the older previous *PMDG Boeing 737NGX* model.

1. Add your new 737NGX livery by cypypaste or PMDG Utility
2. Add the configs to %FlightSim Folder%\PMDG\PMDG 737 NGX\Aircraft
3. When you are ready to fly on any specific airframe and registration, please check its line number (LN) or fleet number (FN) on any online database, e. g. [Planespotters.net](https://www.planespotters.net/) (<https://www.planespotters.net/>)
4. Enter aircraft registration and open its page. Check the "Line Number" field

EI-ENM RYANAIR BOEING 737-8AS(WL)

Manufacturer Serial Number (MSN)	35038
Line Number	3528
Aircraft Type	Boeing 737-8AS(WL)

5. When in your flight simulator, open "PMDG SETUP" page in your CDU. Then open "Aircraft" page (*Note: these screenshots below are from PMDG Boeing 777, but the principle remains the same*).

6. Select "Load From Another"

7. Select the required config according to your airline, registration, type and line/fleet number from the list.

iFly B737NG FP3.2+

This section describes *iFly Boeing 737NG with Feature Pack 3.2* and later.

1. Add your new livery with the iFly Configuration Manager. See the “*Adding Livery Info*” folder in order to see the correct winglet, eyebrow and MCP options for the liveries.
2. After adding the livery, open *aircraft.cfg* of the model involved
3. Find your livery record and check the number in “*MyConfig=*” line.
4. Open config folder *%FlightSim Folder%\iFly\737NG\MyConfig* and find the *.ini* file of your new livery.
5. When you are ready to fly on any specific airframe and registration, please check its line number (LN) or fleet number (FN) on any online database, e. g. [Planespotters.net](https://www.planespotters.net/) (<https://www.planespotters.net/>)

EI-ENM RYANAIR BOEING 737-8AS(WL)

Manufacturer Serial Number (MSN)	35038
Line Number	3528
Aircraft Type	Boeing 737-8AS(WL)

6. Open the iFly *.ini*, copy and paste the contents from the required config by L/N to the iFly *.ini*, save and close
