

Creation App Exploration & Analysis

- Spend time exploring tools to create multimedia projects for school year. I've linked up my [Pinterest Board here](#). This might be a good place for you to start. Feel free to explore on your own as well.
- Consider how some of these tools would match up nicely to the structure required for teaching certain concepts.
- **Make a copy of this document by clicking on file>make a copy. Give me edit rights so I can leave comments to your questions.**
- Name the file with your last name before you begin filling in the table below.
- If you have more apps than there are rows, simply click table>add row below to continue.

| Name of Creation App (an app could be a web tool or an iOS app or an Android app) | Curricular Matches (Specifically, how does this app fit into a learning objective?) | Questions or wonderings about this app. (what else do you need to know about this app to be successful?) |
|--|---|--|
| Soundation.com | This app is like GarageBand but for Chromebooks. It helps the students create loops and create projects to try and be like EDM artists. | Can the kids record their voices on this to possibly create podcasts? |
| WeVideo | This app allows students to create videos and add pictures and music to presentations. | Can I use this to make commercials or make music? |
| Twitter | This app will help my students and me connect with people across the world. | How can I use it in a music classroom other than having a twitter chat? |
| Class DoJo | This app helps communicate with parents and helps with mindful activities and behavior in the classroom. | How will the students react to the little monsters? How will the students like the positive and negative points? |
| QR readers | This app will help share links and activities in the classroom. | Do Chromebooks allow them to scan for QR codes? How else can I use QR codes in my music classroom? |
| NoteFlight | This app is a sheet music making software. | No questions about this other than how can I connect poetry to writing lyrics? |

| | | |
|--------------------------|--|--|
| Voice recording software | Apps like these can help with assessment. | What happens if the students REFUSE to record their voices? |
| Noteability | I heard about this app, but it's used for IOS and this won't work for me. | I need apps that are used on Chromebooks, so I don't need to look into this one. |
| Quizalize | This app can help with Formative assessment. | How is this better than Kahoot for music teachers? How can I put the standards in for music when they aren't uploaded already. |
| PlayPosit | This app is a lot like EdPuzzle | How much time will this save me? I don't think much because there is not many music videos at all! |
| Sway | This is a microsoft product, so I don't have to look into this because I need Chromebook apps. | I don't need to look into this because it is Microsoft, and won't work with our Google database. |
| YouTube Editor | I really want to look into this to show off my kids and their singing of their concert pieces. | Have you used this? And what can I use it for? |

Rubric:

Possible points: 4

| | | | |
|---|---|---|--|
| 4 Excellent | 3 Good | 2 Satisfactory | 1 Needs Improvement |
| Contributed 4-6 different apps and replied to at least two questions/comments | Contributed 3-4 different apps and replied to at least one question/comment | Contributed 1-2 apps but did not reply to any posted questions/comments | Did not contributed to the document or only added one app and did not post or reply. |
