

Looking at Ecosystems

Animal or Plant	Ecosystem	Predators/ Threats	Defense	Food	Why it is suited to this ecosystem	Questions
Dana Octopus	Deep sea	Sperm Whales	Blinds its predators	Fish	The flash is more affective in dark places because it's more of a surprise.	Does it only eat fish? What happens after the flash? Whats the difference between a squid and an octopus?
American Bull Frog	Pond	fish, snakes, birds and even people	Wrestling	all kinds of insects, mice, snakes, fish, and other small creatures.	There is water there and most frogs live in water.	Why is it suited to live in ponds? Why do people eat them? What do bull frogs taste like? Why is it called a 'Bull' Frog.F
Beelzebufo (Devil Frog)	Madagascar Jungle	Dinosaurs	Big mouth that swallows its prey	lizards and other small animals, perhaps even hatching dinosaurs.	Because It's food is there and it can blend in with other animals	How did it become extinct? Why is It's nick name 'Devil Frog' ? Did French people eat them? Is a Beelzebufo French for devil frog?
Bullockornis (Demon Duck Of Doom)	Australia 15million years ago	None, Maybe Poachers	Strong beak and HUGE body	Plants (It's a herbivore)	It is big and could blend in with the trees	How did it become extinced? Why is it called a 'Demon Duck of doom'?
Goliath Tarantula	Remote rain forest of South America	People	Poison	Small animals	They're nocturnal and their black body is hard to see	How does their poison affect people? Are their bellies piousness?

Komodo Dragon	Komodo Island	Nothing	Quick moving	ANYTHING	There's lots of food	Do the really eat people? Are they dragons? Could Dragons be living among us today?
Giant Sting Ray	Cambodia, Coon falls	People and Polluted water	Its sting	Fish	There's fish in rivers but they're becoming extinct	Why are they endangered? Does it live in any other places?
Poison Ivy	North America	Weed cutters	Poison	Water	Because it blends in with other plants	Can you die from Poison Ivy? How strong is the poison? Is there Poison Ivy in New Zealand?
Tiger	South-East Asia and India	poachers	Fast moving and strong, sharp teeth	small animals such as turtles and frogs, as well as large animals such as buffalo and large deer.	They can camouflage with its surroundings	Do all tigers have the same pattern? How old can they be before they die? How many types of Tigers are there? How do Tigers hunt for their food?
