growf!

Heyo! Back again and plenty of picture links yet again this week as paw-artists have been churning out good stuff like crazy. :D Also got a character highlight this week for y'all (and I have broken the trend for Russian highlights, lol).

Oh, and I do have an advance apology for Nommz - just as I was about to post this, I realized he had a big update of pics in Weasyl (which I didn't check until just now), DOH! So... I shall add that for next week! <_< Out of time for today!

Enjoy!

Canada's RADARSAT Constellation Mission

This week, [SpaceX launched the RADARSAT Constellation Mission](#) from California in a dense fog. If you watch the video in the link in the title, you'll see the massive capabilities of this system for Canada. I love seeing such incredible tech used *for* the people of a nation instead of against another. I hope others will follow the example.

Cat filter accidentally used in Pakistani minister's live press conference

And the world was richer for it. XD

[Epic Rap Battles of History -- "Ronald McDonald vs. The Burger King!" -- 2019](#)

YES! OMG... I love these so much. This is hilarious watching two famous mascots for two crappy fast-food joints going head to head, heh. Make sure you watch to the end for a surprise 3rd entry. ;) Side note - Epic Llyod looks incredibly good as The Burger King, doesn't he?

 - <https://www.furaffinity.net/view/31902720/>
 - A copy/paste of my comment from FA on this: Ooooo nice - very, very lovely foot and cool to see a C1 yoshi character at that. What really sells this one is her eye and that look; it's like you were staring at her sole as she started to until the other shoe, thinking you were doing so without her knowing, then she glances over and meets your eye with that big, beautiful blue one and gives a little smirk to let you know she knew EXACTLY what you were looking at. So Awesome. -- TC

Open for Sales/Commissions

NOTE: Just because an artist is not marked with "paw-friendly" doesn't mean they don't draw paws - just that I'm not sure if it's a theme they do a lot. I try to use that indicator when the artist is known to draw paws a lot, or has confirmed they don't mind the subject. Also be aware that this is a point-in-time list - it is accurate night of the Paw-Post's release, but may change as slots fill up. Always check!

Name: Xander

Species: Renamon Kyubimon Hybrid

Gender: Male

Age: 31

Height: 6'5"

Weight: 185lb

Footpaw Class/Type: C2

Location: Generally within the normal world.

Special Powers and/or Abilities

- Size shifting mostly by compressing or decompressing their data.
- Has been known to 'hack' the minds of non digital beings.

Relationship Status: Single

Sexual Orientation: Bisexual

Character Summary

Like many of my characters, they're an extension of me in some ways. This iteration of Xander in particular is more focused on my more centered and matured side, while also being more outgoing and open than I personally tend to be in the real world.

Like me, they tend to be generally quite blunt, not very subtle. Preferring to say things plain and simple, rather than mincing words or hiding intent.

They aren't unkind however, and have a lot of my more caring and cuddly side through their personality.

Some Q&A

(TC) Hi Xander! Welcome to the Paw-Post and thanks for taking some time for us. :) My my, I think you are one of the most distinguished looking digimon around. How did you end up as the hybrid that you are? It's certainly unique.

(Xander) Pleasure to be here, TC, and thank you. As for the current state of myself.. well; You know that little warning computers and games give not to turn them off when they're updating or saving?
Counts for digimon to!

(TC) Oh. O_o Well... shall have to keep that in mind. I guess there's no digimon equivalent of fsck we can run on ya. *chuckles* BUT... why would we - what an interesting and handsome guy it resulted in! Now, being the Paw-Post and all, the footpaws are always an area of interest and focus and one of the neat things with your looks are those lovely feet of yours; renamon in general appearance, but plantigrade and smooth-soled. I don't think I've ever seen anything quite like them on a digimon. Are you glad that's how they turned out?

(Xander) Well I'm not exactly your everyday run of the mill Rena now, am I? *chuckles* Though I'm not really sure which I'm more of really; Rena or Kyubi. I'm quite content with them, certainly! I've seen other Rena's out there with the three toe'd digitigrade look and.. well it's never struck anything in me? And what's the point of

being digital if you don't take advantage of that fact to.. improve yourself a little? I've certainly had no complaints on the matter; and more than my share of compliments~

(TC) I don't doubt the compliments part one bit - you have very attractive feet. And they feature pretty prominently in your gallery too, so safe to assume you are well aware of just how attractive they are?

(Xander) What's that saying some of you organic folks use.. 'If you've got it; flaunt it'? I found very early in that folks seemed quite taken by the unusual nature of my feet, given what I am. Not as a Digimon should have, but yet not as a human might have, either. I suppose it plays to all those adorable folks out there who both love my species in general; but also have a thing for silky soft feet.

(TC) Mmm... makes sense - a "best of both worlds" kind of scenario. And uh... from quite a few of the pictures I've seen, you are most definitely good at flaunting them. Do you enjoy having people stare at them, or even worship/pamper them? Or is there more to it than that?

(Xander) I won't deny, I do get a particular kind of tingle in my code when I know people are admiring, craving, even lusting after them. It's not common that I'll let someone... indulge in their craving or need to be at or under my feet; which in itself has a delicious touch of power to it in knowing it's my decision to torment or tease them~

(TC) Oooo, and that is an interesting little place to be too - torment or tease could well be the same course of action depending on whether the person even likes feet or not. *grins* Which brings me to another interested, but related point about your abilities - the ability to infect the minds of others in such a way as to influence. Ever use that to take someone who is not into feet or perhaps.... in denial, and use it (along with your feet) to uh... change their mind?

(Xander) Have I ever used my virus abilities in that way? No. I'm not one for robbing a person of their will as others might be, or trying to pass on my interests to them in such ways. It adds.. a false flavor to things? knowing the lust or craving is an implanted one, not their own.

Now as for 'tweaking' the minds of those I know already have such cravings? Oh you've no idea the fun I've had. Whether it's just inducing a few idle daydreams and stimulations to help increase their already present desire, to fully enthralling another through their subconscious desires.

(TC) Ahhhh, very good clarification. Heh - I like that term too "tweaking." ;) So for those who adore your feet, what are some of their favourite things about them? Do they tell you?

(Xander) Most commonly? simply the fact that I have feet at all, rather than the usual paws of my kind. many of my admirers enjoy smooth skinned soles over say.. the pads and fur common to my kind and even a large portion of Anthros. I've got the form and function in the almost human shape, which attracts those who prefer the more foot than paw type feet. Soft silky skin so those who enjoy worship don't have to worry about hairballs; always a bonus, no?

(TC) *laughs!* Yes... everyone forgets the hairball/fur factor sometimes. XD They do indeed look silky soft. And in some of the closer-up pictures of yours, we see too they're very detailed with a lot of fine flex and wrinkle lines in the skin. What about some of their other aspects - are they warm? Soft but tough? Do they have any sort of unique scent - stuff like that?

(Xander) Well I do take pride in them, so a good deal of care went into their coding after the evolution crash. They're pretty warm, but not unpleasantly so. Very smooth and soft to the touch, almost like satin fabric over soft sponge. The kind you, if you were small enough per say; could literally sink into like a down pillow. Smell wise? I'm essentially sterile unless otherwise influenced. I don't have any noticeable scent unless I code it into being so.

(TC) Oooh, curious - for the scent-oriented like myself (both dragon and dog have love it of course), that would be such a strange initial realization. Heh - though the ability to code in what you want would be kinda playful for some folks wondering why they suddenly detect a hint of pizza or their favourite lemon pie. *laughs* Interesting that they're so soft as to be harmless to micro's - I imagine that can be code-enhanced too. Is that something you find some people ask for?

(Xander) I might be a dominant figure in such indulgences, but I'm catering to my play things~ Though I make a firm stance on only clean scents; nothing untoward. As for the softness itself, it's something of a personal choice. I find people take better to them if they can truly nuzzle or press into them and almost be enveloped in a sense. Like a hug; via the sole.

It also stems from a personal creed. I do no harm to my playthings. You'll find many out there who enjoy.. well.. cruel aspects of being a giant to others; I gain no such joy. I enjoy feeling smaller beings underfoot, but want them to enjoy it also without fear of injury or worse.

(TC) *smiles wide* Awww. Well personally, I *adore* benevolent and caring macro's when it comes to micro-play. Also, sidenote, LOVE foot-hugs, heh. But yes, I'm not a fan of the cruelty and brutality you tend to see a lot of the time (which is also why I don't link to such pictures in the Paw-Post). It's nice when a macro is friendly about it, and even better if they're as much into what's going on as the micro's are. Very cool to hear that's how you are with those amazing feet of yours (and presumably the rest of you, heh).

So, slight focus change - we've been talking a lot about what others think of your feet, but how about yourself; are footpaws something you enjoy as well? If so, can you tell us a bit about that?

(Xander) Oh definitely. I'd go as far as to say I enjoy playing with other peoples over having mine played with. Always had an odd fascination for them that I never fully understood while going through the early evolutions. Being in a digital realm and often hopping system to system, I encountered... a lot about them early in. The internets full of Paw'n; who knew~ *chuckles a bit and smiles* Sorry, couldn't resist a pun. Not known as RenaDad for nothing.

But yes, I've pretty much always admired and later loved feet and to a degree, paws as well. Something about the shape of them, the dexterity, the way they look from different angles... and definitely the softness of them. Sometimes all you want to do is just fall face first into a good meaty pair and doze off for a while.

(TC) *sighs happily at that thought* Mmm, amen to that. ^_^ I imagine some micros are happy to take you up on that one (I would too if I got shrunk down, heh). You hit on a good point - I don't think any of us fully know "why" we like them as much as we do. I mean, we can always explain aspects of things we like and why, but never the core reason. We just do. :P

So does RenaDad have a favourite particular type of footpaw? Or class or species?

(Xander) Not just micros. I've been known to 'fill in' my data so to speak. Like how you compress files to make them smaller and easier to transfer? I do similar, but I expand the spacing and fill in the gaps with null code. Why should the smaller ones be the only one to enjoy it after all?

Favorite type? Hrm. I'd have to say top position on my desire is split between your normal 'human' style five toed style with furless sole and furred tops, or similar to my own four toed style. Purely plantigrade, mind you.

(TC) Mmm I do love how you think about all this stuff - very balanced.

Ahh, so C2 by our measure. That definitely is a very unique class that can easily straddle both worlds when it comes to paw types.

So what other things outside of paws does a Xander-class digimon enjoy doing? Any hobbies, other kinks - stuff like that?

(Xander) Well I'm quite a fan of the Airsoft sport. Always pleasant to see people both out getting a little air and exercising while also working as a team. I've dabbled a few times in 3D sculpting also, though i admit I'm not that talented at it yet. But as they say, practice and persistence are the key!

As for other kinks? my my, a little forward there, aren't we? well, I enjoy most of the general things you'd assume come with 'macro' scale play. Maws, paws and all that fun stuff, though always safely as I've mentioned. I don't deny I get... excited using some of my more virus based abilities to influence or temporarily 'alter' my willing playthings.

(TC) Oooo neat - I'm always amazed at how realistic they make that airsoft stuff; a lot better than the airguns I had when I was a kid (back in ancient times). :P

And you can say no! *laughs* Very nice though - all sound fun, and I really like that you are always careful and safe - that's so heartwarming. :) How do you sometimes tweak things?

(Xander) Oh I know! I used to have a little old west style six shooter that took those plastic cap rings as a wee Viximon! the hats never quite fit though; I was like a fuzzy plum pudding!

And I don't mind, just being a little playful~ As for the tweaking.. it honestly can vary greatly from person to person, their willingness and interests. A heightening of arousal, implanting some enhanced thoughts and desires to constantly probe at them through their day.. generally slowly building up a need and desire based on their own already existing urges; all key'd toward myself... like when you have a romantic interest in someone, and they constantly enter your mind; only far more direct and imploring.

(TC) Ahhhh... in a way, it's not that dissimilar from the hypnotism that Ash talked about quite a few months ago when he was a highlight; same sort of heightened focus and arousal on things to enhance the experience. Nice.

Okay so... I have a curiosity about digimon that I've always wondered about. So erm, another sorta kinky-personal type question here. In your pictures, we can see you are aroused, so presumably you sometimes follow through. How does that work? Like I mean... what is the fluid and.... stuff if you're digital? *cheek fur puffs*

(Xander) *blinks for a moment and then laughs warmly* Oh indeed I've had sex, if that's what you mean~ As for what I produce and how it works.. it is essentially just compressed physical data like the rest of me, just in a fluid form... think of it like I'm clearing out my cache, just getting rid of some un-needed data reels~

It breaks down and fades away shortly after release and leaves no residues or the like behind. We don't copulate or reproduce the way organic beings do as you likely know, so my own personal additions are simply for my own curiosity and indulgence.

(TC) Ahhh... heh, okay then! See I'd always wondered about that. XD So when it comes down to it, it's pretty similar for the organic that might get to experience - just... cleaner in the long run, hurr.

Do you have any particular close friends or romantic interests outside of the normal play? Or do you try to keep things more casually friendly?

(Xander) In general, I'll only engage in something you might consider intimate or sexual with a very select few people, and even that itself is rare. A few of my closest friends and people I could say I care for and love? some you likely know already, such as Dylan the rabbit, the little Taomon known as Sprite and a Dragon mutt many are familiar with, Nommz.

(TC) *grins* Ahhhh.... a very wonderful group of people, all of which have been featured on here at one point or another too, at that. Then all the better that it's something special for those close to you. :)

Did you have any questions you wanted to ask in return? Or, failing that, to round things up, is there anything you'd like to say to your watchers, friends and fans along with the readers of the Paw-Post before heading out?

(Xander) They're indeed part of a small group that I consider my closest friends, and I'm proud to know all of them.

I've no real questions myself, it's just been fun to sit and chat for a while; even if your eyes keep wandering down south~ * chuckles warmly and shrugs, idly resting his ankle on his knee and drumming his fingers on his toes*
As for some parting wisdom?

Be you and be yourself, not what others expect of you or want you to be. You can waste so much of your time and life trying to be what others want, or letting others influence you into things you don't like or want. At the end of the day, you should be happy with who you are and what you've accomplished as yourself; not what others tried to make you.

(TC) *smiles, prying eyes away from the sexy feet for the sage advice* Mmm, well said, VERY well said! Thank you so much for popping over - I hope we get a chance to talk again off interview time, heh. For the rest of ya, go check out Xander's fun page and gallery for lots of interesting pictures of this unique digimon at work (and some incredibly lovely close-up views of those nice digi-toes).

And that's it for this week all! See you again next Monday, and have a safe and fun week. :)

TC
