

We, the undersigned, agree to the following:

1. MIT commits to rejecting any current and future direct or indirect influences of the Ministry of Defense of Israel on research projects at MIT, including:

- as a **primary** sponsor of sponsored research projects at MIT
- as a **direct** sponsor of sponsored research projects at MIT
- other collaborations in which the Ministry of Defense of Israel is involved in the funding, sponsorship, development, or selection of research objectives conducted at MIT.

2. MIT commits to rejecting any involvement of the Ministry of Defense of Israel in non-research global initiatives at MIT, including but not limited to academic programs, internship and recruitment initiatives, and startup development.

3. MIT commits to ending current research contracts and arrangements with the Ministry of Defense of Israel immediately (currently denoted as Sponsor ID#: 001134), including the titles *Coreset Compression Algorithms* and *Autonomous Robotic Swarms*, of which the Ministry of Defense of Israel is currently a direct sponsor. This extends to project proposals currently in the request or renewal phase.

4. MIT commits to providing transitional funding for graduate workers and research staff whose funding is disrupted by the cutting of complicit research contracts and facilitating the implementation of that transitional funding process.

5. MIT commits to announcing the contents of this agreement to the entire MIT community publicly prior to the end of the Scientists Against Genocide Encampment.

6. MIT Coalition for Palestine commits that, should the aforementioned demands be met, the Scientists Against Genocide Encampment on Kresge Oval would end by 12 PM on Sunday, April 28, 2024.

This commitment by the institute will be codified in MIT policy, including on research contract procurement, by July 1st, 2024.
