

Application for Sustainability Leadership Recognition in Robotics 2026

Name:

Organization/Affiliation:

Email:

Country:

*Please follow the provided structure and headings when preparing your application. The suggested length for each section is a guideline to help keep your submission clear and concise. While a few extra words in some sections are acceptable, please ensure the entire application, including pictures, does not exceed **3 pages**. Use your judgment to provide a comprehensive yet focused description of your sustainability efforts.*

Title of your Project

Please provide a clear and precise title for your project or initiative. This title will be used in official communications such as social media posts, workshop slides, and the award ceremony, so keep it concise and representative of your work.

Applicants and brief information about their organization

Provide a brief overview of the applicant(s) and the organisation, project, or initiative they represent. Include any relevant context such as name, mission, history, or expertise.

Length: 0.5 pages

Project information - Executive Summary

Provide an overview of your sustainability effort or project, including its purpose, progress, and overall impact. Describe the key measures or processes your team has implemented to advance sustainability in robotics—whether through technology, operations, organizational initiatives, or community engagement.

Length: 0.5 pages

Motivation for Application

Explain why you are applying for the Sustainability Leadership Recognition in Robotics 2026. Describe the sustainability challenge your project or initiative addresses and why it matters.

Length: 0.5 pages

Sustainability Effort Focus Area

In this section, please describe the core sustainability effort you are submitting. Explain what your project, initiative, or activity aims to achieve, which sustainability challenge it addresses,

and why this challenge matters. Clearly state whether your work focuses on Robots for Sustainability, the Sustainability of Robots, or both, and describe how this focus is reflected in your actions.

Length: 0.5 pages

Achieved/Expected Impacts

Please describe the impacts your sustainability effort has achieved or aims to achieve. You may address one, two, or all three of the following dimensions:

Environmental: Impacts on nature, resource use, emissions, waste, or energy.

Social: Impacts on people, communities, inclusion, wellbeing, or safety.

Economic: Impacts on costs, business viability, efficiency, or value creation.

Length: 0.5 pages

Roadmap and Future Plans (Optional)

If available, please describe your strategic vision and upcoming milestones. You may include plans for partnerships, innovation, and how you intend to develop or scale your sustainability effort in the future. This section is optional—only include it if you already have clear ideas or plans.

Additional Information (optional)

Depending on relevance, you may also include information about your team's diversity and expertise, technological innovation, community engagement, business viability, scalability and adaptability, energy efficiency, resource use and waste reduction, lifecycle analysis, circular design, end-of-life considerations, and compliance with applicable regulations.

Supporting Documentation

Please list any links (webpage, video, etc.):

Applicant Declaration

By submitting this application, you confirm that the information provided is accurate to the best of your knowledge and that the project complies with relevant sustainability principles.
